Executive Summary

Franklin Township is a predominantly rural community in southern Gloucester County. It is also one of New Jersey's largest municipalities, 56 square miles in size. The western part of Franklin contains defined commercial centers along a corridor containing State Highways 47 and 55. The central and eastern parts of Franklin consist of low-density housing, farmland and forests. The eastern one-third of Franklin Township is part of the Pinelands National Reserve. That area is subject to land-use regulations set forth by the New Jersey Pinelands Commission.

Throughout Franklin there are 4,463 acres of preserved land, or 12% of Franklin Township's land area. 22% of Franklin's land area is cleared agricultural land, 41% is forested uplands, and 18% is wetlands.

Several headwater streams of the Maurice River and the Great Egg Harbor River run through Franklin Township. In their lower reaches these rivers have both received Wild and Scenic designation from the National Park Service. The stream corridors in Franklin contain extensive wetlands. There are also wetland forests throughout the southeast part of the Township.

The Township of Franklin established a dedicated tax for the acquisition of open space through voter referendum in November of 1999. In January 2000 the Open Space Trust Fund began collecting one cent per \$100 of assessed value. Franklin Township created an Open Space Committee to oversee the completion of an Open Space Plan and to recommend parcels for preservation.

This Plan recommends a system of greenways to protect Franklin Township's waterways and lakes. Greenways will buffer the streams from encroaching development and storm water runoff. Greenways will also provide wildlife corridors which will allow for movement of wildlife across a fragmented landscape. A system of multi-use trails is also recommended as a means to connect established parks throughout the Township. Further, the Plan recommends the protection of remaining upland forest. Upland forest is critical to the recharge and protection of the Kirkwood-Cohansey Aquifer, upon which Franklin residents depend as the source of their residential water needs.

The Plan includes an inventory of potential open space that includes vacant properties, farmland assessed properties, tax-exempt properties, and residential properties greater than five acres. These properties are shown on the *Open Space Map* in the Maps Section. Also included in the Maps section is a *Greenways Map*, which depicts the areas of the Township where effective greenways could be established. The Land Acquisition section identifies specific properties that could be included in the Greenway plan.

The Plan concludes with an Action Plan that describes the next steps towards implementing the Open Space and Recreation Plan. One of the first recommendations is to adopt this Plan as part of the Township's Master Plan. The next step for the Open Space Committee is the identification of specific property priorities based on the objectives and goals outlined in the Plan.

The Landscape of the Township of Franklin

“At one time . . . game was plentiful through the large forests, and it was no unusual thing to see bears and wildcats, and the howl of the wolf was nightly heard.”

*from an article printed in The Sentinel’s 175th Anniversary Edition,
originally printed in 1903 in Valley Ventura.*

The Township of Franklin is located in southern Gloucester County, New Jersey. It is bordered by nine municipalities: Elk Township, Monroe Township, Clayton Borough and Newfield Borough in Gloucester County; Buena Vista Township and Buena Borough in Atlantic County; Vineland City in Cumberland County, and Pittsgrove Township and Upper Pittsgrove Township in Salem County. The majority of Franklin Township is forested. One-third of the Township’s land area falls within the Pinelands National Reserve and is under the jurisdiction of the Pinelands Commission (*Township of Franklin Master Plan p.16*).

Open Space preservation can protect natural resources that perform valuable functions that sustain a community. A description of the natural resources of Franklin Township provides a basis for open space preservation in the community.

Natural Resources

Geology

Franklin Township is situated near the western edge of the Outer Coastal Plain, the largest of New Jersey’s five physiographic provinces. The waters of this province drain to the Atlantic Ocean and the Delaware Bay. The Outer Coastal Plain is the state’s youngest region geologically. Its origins can be traced to a series of oceanic encroachments and retreats, which deposited layers of clay, silt, sand, and gravel (*New Jersey Geologic Survey*).

The land within Franklin Township is composed primarily of the Cohansey Formation, with overlying patches of Bridgeton Gravel. Underlying this layer is the Kirkwood formation, which consists of layered sand, clay and gravel (*Township of Franklin Natural Resources Inventory, p.12*). These layers together form the Kirkwood-Cohansey Aquifer, which covers an immense area of southern New Jersey’s Outer Coastal Plain. It is because of the sandy, gravelly soil, through which precipitation can easily percolate, that this aquifer has such high recharge rates. It is estimated that the aquifer contains “17 trillion gallons of some of the purest water in the country” (*Pinelands Commission D*).

Soils

There are two main soil associations in Franklin Township. The first is the Aura-Sassafras-Downer Association. Aura and its variants are the most abundant soils in Franklin Township. These soils account for 14,594 acres (41%) of Franklin's land area, and consist of sandy loam with variable gravel content. Aura soils are well-drained, and are found in upland areas of the Township, such as watershed divides (*Township of Franklin Natural Resources Inventory, pp. 13,14; Table 4*).

Downer soils are another abundant soil type in Franklin Township. Downer soils consist of fine sand or sandy loam, and occur over 6,926 acres (20%) of Franklin's land area. These soils are also well-drained, and, in Franklin, are found downslope of Aura soils. Sassafras and Woodstown soils are found over 3,234 (9%) and 3,250 (9%) acres of Franklin, respectively. Sassafras soils are sandy and well drained. And like Aura soils, Sassafras soils have their origin in Bridgeton Formation deposits. Woodstown soils are mix of two soils common on the lowest uplands throughout the Township, often found near stream corridors. Woodstown soils are of a very fine texture, having been deposited as erosion from both Sassafras and Aura soils (*Township of Franklin Natural Resources Inventory, pp. 13-14; Table 4*).

The Aura-Sassafras-Downer association is always found in upland areas of the Township. These soils, because of their sand and gravel composition, are well-suited for groundwater recharge and agriculture. This is important for Franklin Township as residents rely entirely on groundwater for their needs. These soils efficiently recharge ground water, but for the same reason place groundwater resources at a greater risk of contamination (*Township of Franklin Master Plan, pp. 77-78*).

The second association is the Muck-Alluvial-Land-Fallsington-Pocomoke Association. Fallsington, Muck, and Pocomoke are three soils types associated with wet conditions in Franklin. They are found along stream corridors and in wetlands. Fallsington is fine sand to clay loam soil found in wetland areas of the Township. Muck soils are always found with water, as streamside organic sediments or in depressions. Pocomoke, a loamy soil, is found in depressions in seasonally saturated conditions. Together these soils make up 8% (2,608 acres) of Franklin's land area (*Township of Franklin Natural Resources Inventory, p.14; Township of Franklin Master Plan, pp. 77-78*).

Because of the wet condition of these soils, they provide a poor base upon which to build any structure or to engage in any economic use of the land. These soils are found in areas that receive discharged groundwater, such as streams, wetlands and floodplains. Therefore these soils are not important areas for groundwater recharge.

Watersheds

Two watersheds drain Franklin Township: the Maurice River watershed and the Great Egg Harbor River watershed. A slight ridge, bisecting the Township in a generally north-south direction, divides the two river systems. The Maurice River system, which in

Franklin contains three main tributaries, drains 25,000 acres (71%) of the western portion of Franklin. The three main tributaries in Franklin Township—Scotland Run, Little Ease Run and Still Run—follow predominantly southerly courses (see *Franklin Township Natural Features Map*).

Several tributaries of these streams run through Franklin Township, including Reed Branch, which drains to Still Run, and Indian Branch, Malaga Branch, Hell Branch and Scotland Branch, which drain to Scotland Run. Little Ease Run has no notable tributaries. About two miles south of Franklin Township Still Run and Scotland Run join to officially form the Maurice River. From that point the Maurice River flows about 25 miles south where it empties into Delaware Bay. The Maurice River and its tributaries in Franklin Township are classified by the New Jersey Department of Environmental Protection as FW2-non-trout production (*Township of Franklin Natural Resources Inventory pp. 15-16; Office of Environmental Planning*).

The Great Egg Harbor River system drains the remaining land area of Franklin, about 10,459 acres (29%). Hospitality Creek, a main headwater tributary of the Great Egg Harbor River, runs roughly parallel to the Franklin-Monroe border in Monroe Township. Several smaller creeks, originating in Franklin, drain to Hospitality Creek, including: Marsh Lake Branch, White Oak Branch, and Faraway Branch (see *Franklin Township Natural Features Map*). The Great Egg Harbor River is classified as FW2-non-trout producing (*New Jersey Department of Environmental Protection 1996 State Water Quality Inventory Report*).

Both the Maurice River and the Great Egg Harbor River are federally designated Wild and Scenic Rivers in their lower reaches. Since the passage of the Wild and Scenic Rivers Act in 1968, rivers that “possess outstandingly remarkable scenic, recreational, geologic, fish and wildlife, historic, cultural or other similar values” have been added to the growing system. The Act further established that waterways within the Wild and Scenic River System “shall be preserved in free-flowing condition, and that they and their immediate environments shall be protected for the benefit and enjoyment of present and future generations” (*National Park Service D*).

In 1993, 35 miles of the Maurice River were added to the Wild and Scenic River System. The federally designated segment included from the Route 670 Bridge at Mauricetown to the south side of the Millville sewage treatment plant. (*National Park Service C*). 129 miles of the Great Egg Harbor River were designated Wild and Scenic in 1992. The designated sections are from the mouth of Patcong Creek to the Mill Street Bridge, from Lake Lenape to the Atlantic City Expressway, and from the Williamstown-New Freedom Road to the Pennsylvania Railroad right-of-way (*National Park Service B*).

The Maurice and the Great Egg Harbor are the only two Wild and Scenic Rivers entirely within New Jersey’s borders. They are also important rivers, both ecologically and recreationally. Franklin Township is in a unique geographic situation: The Township’s waterways are headwater streams for both of these nationally renowned

rivers. Although the Wild and Scenic designations do not begin until after the rivers leave Franklin Township, no actions affecting upstream water quality can be isolated from affecting water quality in the lower, Wild and Scenic reaches of the rivers.

Wetlands

Wetlands are an important natural resource. Wetlands help mitigate the effects of flooding, provide wildlife habitat, and provide an interface between ground water and surface water. Nearly 18% of Franklin Township is mapped as wetlands (*Township of Franklin Natural Resource Inventory, p.17*). All of Franklin's wetlands have vegetation covers sufficient to be considered forest. Although isolated patches of wetlands exist in Franklin, the majority of the Township's wetlands are associated with the municipality's stream corridors. There are three particularly large concentrations of wetlands in Franklin. They are located along Indian Branch, in the center of the Township, and along White Oak Branch and Marsh Lake Branch, in the southeastern section of the Township, near Blue Bell and Piney Hollow (see *Franklin Township Natural Features Map*). A 20-acre site containing a great blue heron rookery is located in Franklin Township along Scotland Run. This is one of only five rookeries in New Jersey. Great blue herons are listed as threatened species while nesting (*Township of Franklin Master Plan, p. 81*).

Groundwater Resources

All residents of Franklin obtain their drinking water from private on-site wells. The wells pump water from the Kirkwood-Cohansey aquifer, an immensely productive aquifer of national significance. It is estimated that the aquifer contains between 13 and 17 trillion gallons of water (*Township of Franklin Natural Resources Inventory, p. 18; Pinelands Commission D*). The *Township of Franklin Natural Resources Inventory (p. 18)* states that the Kirkwood-Cohansey Aquifer "is an important water reserve and provides the potential for the eastern U.S.'s largest source of unpolluted and potable water."

The surface of the aquifer is shallow, occurring generally less than ten feet below ground level. Aquifer recharge occurs solely by means of rainwater infiltration. In Franklin the most productive recharge areas are those situated in upland areas with sandy soils – the Aura-Sassafras-Downer soils. These areas include uplands in and around the villages of Malaga, Plainville, Janvier, and Star Cross and along the ridge separating the Maurice River watershed from the Great Egg Harbor River watershed.

Maintaining the recharge quantity of the aquifer is important for non-human purposes as well. Franklin's streams are fed predominantly by discharged groundwater. The streams thus depend on a minimum groundwater level for the maintenance of their flow. Should groundwater be drawn down without being adequately recharged, the Township's streams would suffer. (*Township of Franklin Natural Resources Inventory pp. 18-19; New Jersey Pinelands Commission B*).

Because of the Kirkwood-Cohansey Aquifer's high rates of infiltration, the groundwater resources are more susceptible to contamination. This is because water travels from surface to aquifer rapidly, allowing less time for the soil to filter out contaminants. In Franklin the issue of septic system pollution is a very important one to keep track of. The *Master Plan* (p.44) writes, "due to the sandy soils within the Township, which are characterized as very well drained . . . pollution of water bodies is a very real and serious threat."

Natural Heritage Priority Sites

Franklin Township contains two Natural Heritage Priority Sites. Natural Heritage Priority Sites are designated by the Office of Natural Lands Management within the Department of Environmental Protection. Priority Sites "represent some of the best remaining habitat for rare species and exemplary natural communities in the state" (*Office of Natural Lands Management, p.1*). The two Priority Sites in Franklin are Marsh Lake and Little Ease (*see Natural Features Map*). Both Sites were designated to protect critical habitat of the Pine Barren boneset, a perennial herb on the state endangered species list. The Marsh Lake site is located south of Blue Bell on the west side of Tuckahoe Road. The Little Ease site is located along Little Ease Run to the north of Franklinville Lake (*Office of Natural Lands Management, telephone communication*).

Land Use

Franklin Township's landscape is dominated by forest. 41% (14,663 acres) of the Township is upland, dry forest (*see Land Use map*). The southeast corner of the Township, in the Piney Hollow and Blue Bell sections, contains the largest contiguous tracts of forest. Wetlands constitute 18% (6,416 acres) of Franklin's land area. Franklin's wetlands are frequently located in forested areas of the Township. The wetlands themselves have a vegetation cover sufficient to be considered forest. Thus with wetland forests and upland forests combined, 60% of Franklin's land area is forested. Upland forests contain communities dominated by oak, hickory and pine species. Wetland forests are associated with pitch pine, red maple and Atlantic white cedar (*Township of Franklin Natural Resources Inventory pp. 21-23*).

Cleared agriculture currently constitutes 22% (7,830 acres) of Franklin Township's land use. For tax purposes 41% of Franklin's land area is assessed as farmland. The discrepancy between the two figures arises because over 7,000 acres of farmland in Franklin Township is under a woodland management program. This program allows for a farmland tax assessment if the owner has the woodlot under an economically productive plan. The *Forested Areas and Farm Assessed Property Map* highlights which farmland assessed parcels are woodland and which are cleared agricultural fields.

Soil type and quality are vital components of healthy farmland. 21,879 acres (62%) of Franklin Township have been designated Prime Farmland, 5,326 (15%) acres are of Statewide Importance S-1, and 1,678 (4.7%) acres are of Statewide Importance S-2

(Township of Franklin Natural Resources Inventory, pp.10-11; Township of Franklin Natural Resources Inventory, Table 5).

In addition to the above land uses other land uses in Franklin include: urban, at 18% of the Township and Barren Land, at 1% of Township area (*New Jersey Department of Environmental Protection 1995 Land Use/Land Cover Data*).

Pinelands National Reserve

The Pinelands National Reserve—our country’s first national reserve—was established in 1978 by the federal government. This 1.1 million acre area of unbroken oak, pine and cedar forest and slow, meandering streams was recognized for its immense natural and cultural legacies. A year after the establishment of the Reserve, the New Jersey Legislature created the Pinelands Commission with a mission to “preserve, protect, and enhance the natural and cultural resources of the Pinelands National Reserve, and to encourage compatible economic and other human activities consistent with that purpose” (*Pinelands Commission C*). As such the Commission is authorized to set land use policy throughout the Pinelands in accordance with the Pinelands Comprehensive Management Plan. The Plan breaks the region down into several Areas, similar to the methodology of the State Plan. The Commission consists of 15 members, all of whom are appointed by federal, state and county officials.

One-third of Franklin Township’s land area falls under the jurisdiction of the Pinelands Commission. The Commission sets land use policy in that part of the Township. Many preservation options exist in the Pinelands Area that do not exist in the remaining two-thirds of Franklin, such as the Pinelands Development Credit Program, and the Pinelands Density Transfer Easement program. These programs will be expounded upon later in the document. More generally, the land use policies of the Pinelands Commission are set with the intention of maintaining the historically rural and natural character of the landscape. The section of Franklin Township that falls under the Pinelands Commission’s jurisdiction consists of low-density residential development, large tracts of forest and agricultural lands.

Franklin Township’s large area and rural character have allowed many of the Township’s natural resources to remain in a healthy state. The environmental benefits of Franklin Township’s resources are important not only to Township residents, but to neighboring communities as well. The water quality of downstream reaches of the Maurice and Great Egg Harbor Rivers, for example, depend to a large extent on what occurs upstream in the headwater regions. An open space program can ensure that conservation in Franklin Township will protect for the enjoyment of the community vital forest, wetlands, waterways and the wildlife they support.

History

“Only a few years ago, Franklin was a dense forest of small pines, but by industry and frugality, it has in 1883, become of immense value as a truck-farming township.”

From an 1883 book on Franklin Township’s history

A town’s location and natural resources inspire settlement and prompt industry. Native Americans and European settlers both found wealth in the waterways of Franklin Township. The area’s forested landscape also yielded game and timber resources for both cultures. Open space preservation can ensure that elements of a community’s legacy remain part of the present landscape.

Franklin Township was incorporated in 1820 out of Woolwich and Greenwich. At the time of its incorporation it was fifteen miles long and six and a half miles wide, an area of 72,000 acres—roughly twice its present size. The meeting to establish the municipality was held at Cakes Tavern, which is now the Franklinville Inn. Parts of present-day Glassboro, Clayton, Newfield and Elk were included in the original Franklin Township. Over time the Township has lost area to the incorporation of these new municipalities. The most recent was the creation of Newfield Borough in 1924, when the state legislature approved the establishment of the new municipality (*The Sentinel pp. 8-9; The Contextual History*).

By virtue of its large size Franklin Township has a very interesting and varied history. Several economic centers sprang up, then disappeared or became residential. Others, like Franklinville and Malaga retained their economic vitality. A unifying theme of Franklin Township’s history is the role that waterways played in the economic development of the town centers. Created by the mills and factories that sprang up in town centers in the 1800s, the Township’s lakes are a testament to Franklin’s industrial legacy. Agriculture prospered in the rural areas, and still commands a large portion of the Townships’ land use. A good deal of the land that lumber production had cleared has reverted to forest.

There are several structures in Franklin of historical importance, such as the Porchtown Methodist Church, and the Franklinville Inn. There are also three notable archeological sites in Franklin Township. Although these sites are eligible for the State and Federal Registers of Historic Places, none has been included as yet (*NJ Historic Preservation Office, personal communication*).

Early Settlement

The first residents of what is now Franklin Township were Native Americans. Archeological evidence suggests humans arrived in what is now New Jersey 10,000 years ago. The generally accepted belief of Lenape migration—and Native American migration generally—is that they came by way of Asia over the Bering Strait and eastward across the northern tier of the continent. There are several other stories of the Lenape’s migration to New Jersey, the most notable being *Walam Olum*, which states that the

Lenape migrated from Asia eastward to maritime Canada, then west to Indiana and Ohio, and finally on to New Jersey. There is little evidence, however, to substantiate this story (*Kraft; Mounier, personal communication*).

Native Americans of several cultural associations occupied the area of Franklin Township over the years. The name given to the most recent of these people is Lenape, or Delaware. Lenape translates roughly to “The People,” and was self-bestowed. Delaware was the name given by Europeans for the geographical location of the people (*Delaware Tribe of Indians*).

The Indians of interior New Jersey were hunter-gatherers, spending their time traversing the landscape in search of game and other necessities. Major sources of food were deer, nuts and berries. Indian artifacts that have been unearthed are generally located along river corridors and in upland areas at watershed divides. The location of these artifacts indicates that Indians camped in areas where they could exploit the resources associated with the merger of two ecosystems, and the wildlife associated with river corridors. A prominent archeological site in Franklin Township is located near the present Janvier School, along Indian Branch. In 1916 arrowheads, pottery and remnants of campsites were found there. Another site is located along the present Route 55 corridor (*Mounier, personal communication; The Sentinel p. 9; Township of Franklin Natural Resources Inventory p. 3*)

In coastal areas there appears to have been a more permanent pattern of settlement in the form of villages consisting of a few acres. Indians occupying land in interior sections of the state had contact with coastal peoples, or perhaps spent time at those locations themselves. Seashells, for example, have been found at archeological sites throughout interior sections of the state (*Franklin Township Natural Resources Inventory p. 2; Mounier, personal communication*).

There is evidence to suggest that Indians used fire as a management tool in southern New Jersey. Fire was used for a number of reasons: during hunts to drive game from the woods; to create a landscape mosaic more favorable to the success of desired game and vegetation; and to hollow out trees for the production of canoes and mortars. Thus the image of a pre-Columbian wilderness where forests stretched from the Atlantic to the Mississippi is an inaccuracy. Nor were all fires set by humans; in fact, the health of the Pinelands ecosystem is dependent on a periodic natural fire regime (*Mounier, personal communication; Kraft 1986*).

Europeans first began to leave their mark on the countryside around Franklin Township in the late 1600s. These early settlers were of Dutch, Swedish and English descent. From that time until the middle 1800s the landscape remained largely forested, and settlement was dispersed. After forested lands were cleared, and waterways were exploited for their free energy, agriculture and industry dominated Franklin Township’s economy. As industry developed communities grew along the streams and newly formed lakes to provide services for the laborers in the towns centers.

Community Growth

John Porch settled what was to be called Porchtown in 1780 with the purchase of 2,500 acres of land. This was enough land in order that John Porch, in the words of a Franklin Township history, "might leave to each of his numerous family a plantation for their future support" (*The Contextual Information*). In time a gristmill and a sawmill were built on Still Run, forming Iona Lake. Other services in the town, as of 1883, included a blacksmith shop, a shoe shop, and the Porchtown Methodist Church, built in 1828. The population of Porchtown in 1883 was about 70 (*The Sentinel p. 12; The Contextual Information*).

Malaga was formed about 1814 when Christian L. Stanger purchased several thousand acres of land from Daniel H. Miller. A year prior to the purchase, Stanger had constructed a sawmill on Scotland Run. The production of lumber at the sawmill gave rise to Malaga Glass Works, as well as other enterprises in the newly formed town, such as the blacksmith shop, a tavern, and a hotel. Further up, on the east side of the newly formed lake the Richman Brothers constructed a flour mill that was in operation for some time. The old site of the mill was north of where Old Delsea Drive Branches off of Delsea Drive (*The Sentinel p. 28; The Contextual Information*).

A gristmill was built in Malaga in 1830 by John Rosenbaum. The mill was intended to be for his private use only. As word spread of the new mill in Malaga, Rosenbaum was inundated by requests that he offer his services to the community. He expanded his operation and began commercial service soon after. Malaga received its name from the glass-workers of the Spanish city of Malaga, as well as from the planting of Malaga grapes in the surrounding land (*The Contextual Information*).

Franklinville, originally known as Little Ease, was formed in the late 1800s on a 1,000-acre tract of land owned by William Fisher. Sometime before 1800 he built a sawmill on Little Ease Run. It is said that the town received its name when a man injured by a horse kept asking for "a little ease." The town contained, in addition to the mills, a tavern, a blacksmith shop, a shoe shop, a railroad station, a Methodist church, an inn, and a Presbyterian church (*The Contextual Information; The Sentinel p. 8-9*).

Other early settlements include Forest Grove, Janvier and Iona. Forest Grove got its start in the lumber production business. In a 1903 article taken from *Valley Ventura*, it was written that "the country for miles around was covered with a fine growth of timbers," the cutting of which "kept quite an army of men employed." The vitality of the town was lost when the timber was cut over and converted to farmland (*The Sentinel p. 16*). At its peak Forest Grove contained a blacksmith, post office, general store, Methodist church and a school (*The Contextual Information; The Sentinel p. 16*).

Janvier was formed in the late-1800s near the present Janvier School. It was first known as New Denmark because of the large percentage of Danish immigrants inhabiting the area. New Denmark received its own post office in 1874, but it was changed to Janvier five years later in 1879. The change was made presumably to honor the Janvier

family—or one particular member of it, Mary F. Janvier—which owned a great deal of land in the area. New Denmark was never more than a concentration of houses surrounding good farm country (*The Contextual Information; The Sentinel*).

Iona is located about 2 miles south of Franklinville. It was founded by Moses Crane, and known for a while as Cranetown. Crane operated a sawmill until 1830 when he abandoned it. The town got a train station in 1860 and in 1883 it consisted of 75 residents, a sawmill, a general store and town hall (*The Contextual Information*).

Several smaller centers existed for a time in Franklin, most of which are now recognizable only by their crossroads and cluster of houses. These included Downstown, in southern Franklin Township, which had a store, a blacksmith shop and perhaps forty inhabitants. Chewville, which was located in the southeast of the township, contained a church, a sawmill, a cemetery and ten homes (*The Contextual Information*).

An interesting part of Franklin Township's history was the creation of the idyllic Ziontown. In 1891 the Zions purchased 1,137 acres in the vicinity of Tuckahoe Rd. and Dutch Mill Rd. There they built a shirt factory, around which they envisioned the growth of a commercial center. Although designed as an industrial settlement, the community was no doubt inspired by the successful Jewish agricultural settlements in southern New Jersey. Ziontown attracted Jewish immigrants who spoke little or no English, and who were fleeing the oppression of Czarist Russia.

The venture always had the goal of turning a profit for the Zions, but in that quest they seemed to have ignored the basic needs of their employees. As tension grew in Ziontown because of low wages and poor working conditions, the workers revolted and tried to take over the factory. The sheriff was called in to quiet the unrest. Four of the aggressors were indicted. That incident ended the existence of Ziontown. In total the factory operated for 18 months—the same length of time that the Ziontown post office was in operation. By 1913 all the land owned by the Zions and the Jewish immigrants who had been employed at the factory had been sold to incoming farmers (*The Sentinel, p.19*).

Industrial Development

The first industries in Franklin were lumber production and agriculture, both of which directly relied on the land and its resources. As lumber production cleared forested areas of the Township, agriculture became an easier endeavor and it became the dominant land use. Certain sections of the Township were better suited to agriculture than others and these areas remained in use as farmland. Cleared areas where soils were not conducive to crop production reverted to forest.

Areas along stream corridors, where hydropower could be exploited, became attractive as industrial centers. After the establishment of these centers rail lines were built to service the commercial needs of the manufacturing facilities. By 1834 two rail lines were in operation through Franklin Township, both of which were operated by the

West Jersey Railroad. The first line ran from points north, along the current track through Franklinville and Malaga. The second line ran from Newfield to Mays Landing and points east (*Franklin Township Natural Resources Inventory p. 3, The Contextual Information*).

Industrial centers serviced by the railroads include Malaga, Porchtown and Franklinville. These centers still contain the lakes that were formed through the historic impoundments of the Maurice River and its tributaries. With the advent of the automobile in the early 1900s, the industrial and commercial centers were connected by the construction of Highway 47 and, more recently, the construction of Highway 55. To this day Malaga and Franklinville continue to be the Township's major commercial areas.

The Built Environment

"Employment opportunities within the Township may be improved by taking advantage of the access points to Route 55 which are located within Township boundaries."

Township of Franklin Master Plan, p. 88

The built environment will determine where open space preservation can occur. Open space should complement the existing built areas and infrastructure of the Township. Open space preservation will also shape the Township's future growth.

Population

Franklin Township has an area of 56 square miles, or 36,141 acres (*Township of Franklin Natural Resources Inventory p. 2*). By far the largest municipality by area in Gloucester County, Franklin can also be counted among the top twenty-five largest municipalities in New Jersey.

The 2000 census indicates the total population of Franklin is 15,466, which translates to a density of about 274 persons per square mile. Franklin Township's population growth rate was greatest in the periods 1940-1950 and 1950-1960, during which the rate of growth was 46% and 47%, respectively. In the following period, 1960-1970, Franklin's population growth dropped to 21%, before increasing to 38% between 1970 and 1980. The two periods since 1980 (1980-1990 and 1990-2000) have seen Franklin's population continue to grow, but at a decreasing rate. The Township's growth rates in these two periods were 17% and 7%, respectively.

Gloucester County's growth rate from 1990 to 2000 was 11%, slightly higher than the growth rate of Franklin. During this period, neighboring municipalities Monroe Township and Clayton Borough experienced higher growth rates as well, although Clayton added the same number of people as Franklin. Monroe added 2,200 people from 1990 to 2000. Elk Township, to the north of Franklin, lost 8% of its population, or 292 people.

While rates of growth are effective for analyzing trends in population change, the actual number of people added to a municipality over a given time period helps in analyzing the stress on municipal resources, both natural and anthropogenic. The following table shows the growth rate and the actual number of people added per 10-year period.

<i>Period</i>	<i>1940-1950</i>	<i>1950-1960</i>	<i>1960-1970</i>	<i>1970-1980</i>	<i>1980-1990</i>	<i>1990-2000</i>
Growth rate	46%	47.4%	20.7%	37.9%	16.8%	6.8%
Pop. added	1592	2395	1539	3406	2086	984

(Gloucester County Planning Board; Township of Franklin Master Plan p.3).

The Gloucester County Planning Board projects for Franklin Township a growth of 3,284 people over the next 20 years. The growth rate is expected to be around 8% until 2010, after which it is projected to rise to about 12% until 2020. Growth rates in Franklin are expected to be commensurate with those of the County over the next 20 years. Elk Township and Clayton Borough are each projected to grow by about 800 less people than Franklin, but at higher rates; Monroe Township is forecasted to add an additional 10,000 people over the next twenty years with growth rates in the mid teens (*Gloucester County Planning Board B*).

Housing

In 2000 the median housing value in Franklin Township was \$105,000 Franklin (*Gloucester County Planning Board C*). Franklin has one of the lowest housing density figures in the County. This is attributable, in part, to the absence of municipal water and sewer services in Franklin Township. The Township’s Master Plan (*p. 16*) asserts that “because of the lack of municipal water, sewer and storm drainage it is expected that higher density multi-family construction will not occur. A very high percentage of the existing housing stock and probable future housing stock is and will continue to be in the form of detached single-family residences.” Another contributing factor to the Township’s low housing density is the Pinelands Commission’s regulatory control. The Pinelands Commission has jurisdiction over one-third of the Township (*see Open Space Map*).

Roads

Two State highways and one U.S. highway run through Franklin Township. State Highway 55 is a freeway with a stretch of about 5 ½ miles in Franklin. The highway was completed in 1989 and connects Camden and Philadelphia with Cape May and the New Jersey Shore. Highway 55 contains two interchanges within Franklin, one at Little Mill Road and one at its intersection with U.S. 40.

State Highway 47, known locally as Delsea Drive, runs for 6 miles through the Township in a generally north-south direction. This two-lane roadway runs through the town centers of Franklinville and Malaga. The highway once served as the primary route from Camden and Philadelphia to Vineland. However, the completion of State Highway

55, which runs generally parallel to, and to the west of, Delsea Drive, has reduced Delsea Drive's role to one of servicing local commuters.

U.S. Highway 40, known locally as Harding Highway, enters New Jersey at the Delaware Memorial Bridge and runs east to Atlantic City. In Franklin the highway skirts the southern section of the Township, from Malaga along the northern border of Newfield, for a distance of nearly 8 miles. U.S. Highway 40 intersects State Highways 47 and 55 at Malaga.

The remainder of the Township contains county and local roads, with the largest concentration in the Franklinville area. The lowest concentration of roadways is the southeastern section of the Township, in the Blue Bell and Piney Hollow sections. This section is within the Pinelands National Reserve. (*Gloucester County Planning and Engineering Departments; Township of Franklin Master Plan p. 33-34*).

Parks and Recreation Areas

Public active recreation sites in Franklin include open lands around the Township's schools, the Pennsylvania Avenue Recreation Fields and Forest Grove Park. Private active recreation lands include the Franklin Township Youth Soccer Association fields on Dutch Mill Road, the Girl Scouts' Camp Sacajawea and White Oak Country Club.

Franklin Township contains a number of sites devoted to passive recreation. These include Franklinville Lake, Iona Lake, Malaga Lake Park, Malaga Lake North and Piney Hollow Nature Area, all of which are municipally-owned (*see Franklin Township's Recreation and Open Space Inventory in the Appendix*). Other public passive recreation sites in Franklin Township include New Jersey Division of Fish and Game's White Oak Wildlife Management Area, New Jersey Natural Lands Trust property, and Scotland Run County Park.

Private passive recreation lands include the Nature Conservancy property, Girl Scouts property, The "Village Dock" camping area and lake, and the Unexpected Wildlife Refuge (*Township of Franklin Natural Resources Inventory, pp. 9-10*).

A complete inventory of existing preserved land is included in a later section of this Plan. Also included in the *Appendix* is Franklin Township's Recreation and Open Space Inventory, which details the municipally-owned lands devoted to active and passive recreation.

Education

Public educational facilities in Franklin Township are provided by two agencies: the Township of Franklin Board of Education and the Delsea Regional High School District.

The Board of Education operates the Janvier School, Main Road School and Reutter School. The Janvier School, located at 1532 Pennsylvania Avenue, services grades K through 2. Enrollment for the school year beginning in 2001 was 569 students. Main Road and Reutter Schools provide education for grades 3 through 6. Main Road School is located at 1452 Main Road, in the southern section of the Township. The school has 462 students enrolled for the 2001-2002 year. Reutter School, located at 2150 Delsea Drive near Franklinville, has a current enrollment of 404 students (*Township of Franklin Master Plan p. 52; Township of Franklin Board of Education, personal communication*).

The Southern Gloucester Regional School District services grades 7 through 12. The middle school and the high school are both located on Fries Mill Road. The middle school has 660 students enrolled and the high school has 1195 students enrolled for the current school year. The schools accommodate students from both Franklin and Elk Townships (*Township of Franklin Master Plan, p. 52-53; Delsea Regional School District, personal communication*).

Commercial Development

The majority of all economic activity in Franklin Township occurs along Highway 47. The historic town centers gave rise to the highway and rail line, which have supported commerce for many years. However, the remainder of Franklin Township is rural and largely without commercial facilities.

Greater than half of the Franklin Township work force is employed in Manufacturing and Services. In these industries few jobs are located in Franklin Township. Most Franklin residents commute to work in other municipalities. Those that work in Franklin Township are employed at home, in agriculture or at local retail operations. There are few economic opportunities for Franklin residents within the Township.

The Township's economic isolation was due in large part to the limited access to the community, which was historically provided primarily by State Highway 47 (Delsea Drive). With the completion of State Highway 55, Franklin Township finds itself in a much more attractive position to potential employers. As part of its Route 55 Development Strategy, Franklin has established an "office campus" zoning district in the area where US Highway 40 intersects State Highway 55. This zone will also have the effect of bolstering the economic vitality of Malaga, which has historically been an economic center.

A Plan is also in place for the re-development of the Highway 47 corridor, which includes Franklinville and Malaga. The Plan includes an analysis of the present services and a study of what services would be attractive to Franklin Township residents. The Plan also includes a study of the aesthetic features of the village center and what could be

done to bolster the attractiveness of the village centers (*Township of Franklin Master Plan pp. 88-99*).

The Open Space Program in the Township of Franklin

"The Township should enact all measures at its disposal to insure the preservation and conservation of open space."

Conservation Plan, Township of Franklin Master Plan, p. 75

Preservation of open space must be planned just as any municipal infrastructure, such as roadways or utilities. Development of an Open Space and Recreation Plan, and the Township governing body's commitment to carry out the Plan, are essential to maintain a community's character, and to preserve and improve the quality of life for its residents.

The Township of Franklin Open Space Committee has outlined the following open space goals for the Township. These goals and policies will guide the recommendations of the Open Space and Recreation Plan:

- Preservation of the scenic beauty and rural character of the landscape.
- Protection of the Kirkwood-Cohansey Aquifer for drinking water quality and quantity.
- Encouragement of the expansion of the farmland preservation program in the Township. Support of the farmland community in the Township to preserve the rural quality and agricultural viability in the municipality.
- Protection of the stream corridors and lakes in the Township, as well as preservation of wetlands and watershed areas in the Township
- Expansion and connection of existing parks and recreation areas and the creation of new, centralized recreational facilities
- Conservation of wildlife habitat for plants and animals, particularly habitat for threatened and endangered species.
- Development of a trail network connecting residential neighborhoods to natural areas.
- Assistance to landowners in the Pinelands Area regarding the protection of their land by severing their Pineland Development Credits.

Township of Franklin– Master Plan

The goals and objectives of the Open Space and Recreation Plan are drawn from discussions with the Township of Franklin Open Space Committee and the Township of Franklin Master Plan Re-Examination Report. Since a major goal of the Open Space and Recreation Plan is to become an amendment to the Township's Master Plan, consistency between the documents is important. Only the goals that can be achieved through open space preservation are repeated in this Plan.

The Objectives and Principles of the *Master Plan Re-Examination Report* state the following policies (pp. 1–5):

- “Protect and enhance the recreational advantages provided by lakes and natural wooded areas of the Township.”
- “Provide for protection of the groundwater resources of the Township.”
- “Provide for the development and expansion of existing Township recreation areas with facilities to satisfy the needs of all age groups within the Township.”
- “Initiate the acquisition of public lands which would serve as the foundations of the Franklin Township Park System.”
- “Designate those properties to be acquired for parks and open space and encourage contributions of or payments-in-lieu of land for additional acquisition of property.”
- “Preserve the wetlands and the floodways along streams, lakes and rivers in a natural state in order to insure a continual recharge of essential elements required for the sustenance of the aquatic food chain.”
- “Prevent encroachment onto flood hazard areas along streams, lakes, rivers, and wetlands by buildings or uses which would be detrimental to the quality of subsurface and surface water supplies.”
- “Promote the use of planning techniques, such as cluster developments and reinforcement of the existing villages, which aid in the preservation of natural resources such as wooded areas and wetland areas.”
- “Prevent encroachment upon habitat of endangered and/or threatened species of flora and fauna.”

Further, the *Conservation Plan* within the *Master Plan Re-Examination Report* details the following open space objectives for the community (p. 75):

- “Discourage development on the environmentally sensitive areas of the Township.”
- “Acquisition of additional sites that can function as park and/or open space land.”
- “Acquisition of lands contiguous to lakes.”
- “Acquisition of lands adjacent to parcels already owned by the Township to form larger, contiguous open space areas.”
- “Acquisition of parcels and the subsequent vacation of paper streets on the west side of Malaga Lake to enable recreation and open space development along the lake.”

New Jersey State Development and Redevelopment Plan

One-third of the Township of Franklin falls within the Pinelands Area. Within this portion of the Township the State Plan has two land-use designations: Rural Development Area and Agricultural Production Area. The section of Franklin that falls outside of the Pinelands has been designated Suburban Planning Area in the uplands, Environmentally Sensitive Planning Area along the stream corridors, and Rural/Environmentally Sensitive Planning Area in the central part of the Township.

The Pinelands Area of the Township contains land designated as either a Rural Development Area or an Agricultural Production Area. Rural Development Areas are

designed to accommodate modest growth, and to relieve some of the burden on Regional Growth Areas (*Pinelands Commission A*).

Agricultural Production Areas are designed, according to the Pinelands Commission, to “accommodate and encourage farming.” In this Area there are limitations to residential development, intended to maintain agriculture as the dominant land use (*Pinelands Commission A*).

The *State Plan* suggests goals to guide land use in the Suburban Planning Area. This Area has less intense development, and according to the *State Plan* is able to accommodate growth. Within the Suburban Planning Area the intention of the *State Plan* (p. 175) is to:

- Protect natural resources;
- Redesign areas of sprawl; and
- Protect the character of existing stable communities

In the Rural Planning Area the intention of the *State Plan* is to maintain the environs as large contiguous areas of farmland and other lands (p. 188). This Planning Area comprises much of the agricultural areas of the Township.

The *State Plan* designates the principal waterways of the Township, and the land buffering them as an Environmentally Sensitive Planning Area. This designation recognizes land with fragile ecosystems containing endangered or threatened species, geological features and wildlife habitats (p. 196). The goal of the *State Plan* is to protect these sensitive environmental resources through the protection of large contiguous areas of land.

There are two identified Villages in Franklin Township: Franklinville and Malaga. Villages are compact, primarily residential communities that offer basic consumer services for their residents (page 226).

History of the Open Space Program

The Township of Franklin established a dedicated tax for the acquisition of open space through voter referendum in November of 1999 (*Appendix*). A total of 64 % of the Township residents voted “yes” to the referendum question establishing an “Open Space Trust Fund.”

Resolution R-31-2000 (*Appendix*) establishes an “Open Space, Farmland, Recreation and Historic Preservation Trust.” The Trust was funded by an amount of one cent (\$.01) per \$100 of assessed value beginning in the year 2000. The fund generates approximately \$63,000 per year. As of December 31, 2001 the Open Space Trust Fund in the Township had a balance of \$126,439 (*Township of Franklin, Chief Financial Officer, January 2002*).

The Township Committee has established an Open Space Committee to oversee the production of the Open Space and Recreation Plan and recommend to the Township Committee parcels for preservation. The Committee is composed of seven members including representation from the Township staff, Planning Board, Environmental Commission, Recreational Commission, and Township Committee.

Other Participants in Open Space Preservation in the Township of Franklin

Several regional efforts are working to preserve open space and provide stewardship activities in the Township of Franklin. These regional initiatives include the following participants:

- **National Park Service.** The Maurice River and Great Egg Harbor River are both designated as Wild and Scenic Rivers by the National Park Service. Franklin Township is the headwaters for the Great Egg Harbor River and contains several feeder streams for the Maurice River.
- **New Jersey Division of Fish and Wildlife.** The NJ Division of Fish and Wildlife manages the White Oak Branch Wildlife Management Area in Franklin and Monroe Townships. The potential addition of lands to this State area represents an opportunity to connect other protected natural areas in the Township.
- **New Jersey State Forest Service.** The New Jersey State Forest Service offers private woodlands owners written guidance and financial assistance to protect and improve timber, wildlife, fish, soils, water recreation and aesthetic values of their forested lands. This program was authorized by Congress in the 1990 Farm Bill and administered by the United States Department of Agriculture (USDA) Forest Service and the National Association of State Foresters. Several farmers in Franklin participate in the Forest Stewardship Program.
- **New Jersey Natural Lands Trust.** The NJ Natural Lands Trust owns land in Franklin Township. The NJ Natural Lands Trust was created in 1968 by the State Legislature as an independent agency. The Trust's mission is to preserve land in its natural state to protect wildlife habitat and provide residents with passive recreation. The Trust preserves land primarily by donations of title in fee simple or conservation easements. The Trust manages its properties to conserve endangered species habitat, rare natural features, and significant ecosystems (New Jersey Natural Lands Trust 1998 Annual Report).
- **The Pinelands Commission.** The Pinelands Commission is an independent state agency charged with protecting the natural and cultural resources of the New Jersey Pinelands, a 1.1 million acre state designated area in southern New Jersey. One-third of Franklin Township is located within the Pinelands Area.

- **County of Gloucester Office of Land Preservation.** This agency houses the County Agricultural Development Board and administers the farmland preservation program in Gloucester County. County funding for farmland preservation comes from the Gloucester County Open Space and Farmland Preservation Trust.
- **State Agricultural Development Committee.** Through coordination with County Agricultural Development Boards, local governments and non-profit organizations, the State Agricultural Development Committee administers the state farmland preservation program. The farmland preservation program includes the purchase of agricultural easements, the purchase in fee simple of entire farmland properties (to be auctioned off with an agricultural easement), and the acceptance of donations of agricultural easements.
- **Gloucester County Parks and Recreation.** The County Parks and Recreation Department manages Scotland Run Park in Franklin Township. This actively used park is located in Franklin, Clayton and Monroe and contains a lake and trails. The park protects a portion of Scotland Run—headwaters of the Maurice River.
- **Girl Scouts of the South Jersey Pines, Inc.** The Girl Scouts of the South Jersey Pines operates a camping facility in the Township. Located on 132 acres, Camp Sacajawea services 500 to 700 girl scouts during the summer season. The camp operates year-round, and during the off-season other youth groups use the facility for a variety of outdoor activities. The camp property contains 27-acre Cedar Lake, which is used for boating and canoeing.
- **Upper Maurice Watershed Association.** The Watershed Association is a nonprofit organization that focuses public awareness and support for the upper Maurice River system.
- **The Federation of Gloucester County Watersheds.** The Federation is the parent group that oversees all the county watershed associations. It consists of representatives from all of the watershed associations in Gloucester County.
- **Unexpected Wildlife Refuge.** This property is located in the southeast part of the Township. The public is permitted on this land for passive recreation purposes; The Refuge has been used by pre-school groups, scouting organizations, public school children, senior citizens, families, local civic groups and residents. The primary activities at the site are nature study, bird watching, hiking and field geology. The emphasis of the Unexpected Wildlife Refuge is environmental awareness and natural resource stewardship.
- **New Jersey Conservation Foundation.** The Foundation's mission is to promote conservation of land and natural resources throughout New Jersey. The Foundation supports local land trusts with technical assistance services.

- **South Jersey Land Trust.** South Jersey Land Trust is a regional land trust whose mission is to protect and preserve the natural, cultural, and historic heritage of southern New Jersey. South Jersey Land Trust preserves land through fee simple acquisition and conservation easements. The organization also assists state, county and local entities in open space planning, acquisition and management.
- **Stewart Land Trust.** This small Trust funds land acquisition in Gloucester, Cape May, Atlantic, Cumberland and Ocean Counties. For eligibility a property must either contain water or be adjacent to water. The Fund was established in the 1950s with the goal of preserving wildlife habitat. The Fund consists of \$5 million.
- **The Nature Conservancy.** The Nature Conservancy owns 29 acres in the Township, part of a larger 1,788 preserve called the Willow Grove Lake Preserve. The Nature Conservancy's mission is to preserve plants, animals and natural communities that represent the diversity of life on Earth by protecting the lands and waters they need to survive. They have been awarded funds from the Duke Foundation to acquire and preserve endangered species habitat in New Jersey.
- **Rails to Trails Conservancy.** This national conservation organization focuses its efforts on converting old railroad beds into trails. The railroad bed running through the center of the Township, if abandoned, would represent an opportunity for additional outdoor recreation. The trail could also connect preserved parkland.
- **Gloucester County Nature Club.** One of the oldest conservation groups in the area, the Gloucester County Nature Club focuses its efforts on the protection of the natural areas in the county and providing educational and recreational activities for residents to discover Gloucester County's parks and natural areas.
- **Franklin Township Youth Soccer Association.** The Soccer Association owns and maintains the soccer fields in the Township. Heavily used by Township residents, these soccer fields represent a significant active recreational resource for the community.
- **Cherry Hill Club, Gloucester Sportsmen.** Located on a former cranberry bog, the sportsmen club offers pheasant hunting to their members on land located off of Piney Hollow Road in the Township.
- **Delaware Valley Regional Planning Commission.** DVRPC is a regional planning organization focused on the protection of the watershed servicing the Delaware Valley. Working with Morris Land Conservancy, DVRPC is seeking to implement a program of open space planning and advising for municipalities in the watershed.
- **Morris Land Conservancy.** Formed in 1981, Morris Land Conservancy is a nonprofit, membership organization working in land conservation. The Conservancy helped the Township of Franklin compile their Open Space and Recreation Plan.

Inventory of Outdoor Resources in Franklin Township

"Open space . . . can no longer be considered a given, it must be planned for as a basic infrastructure need as essential as roads, sewers and schools."

*Helen Fenske, testimony, Greenway Council,
Hudson River Valley, 12 February 1990*

This section of the Open Space and Recreation Plan inventories the open space lands within Franklin Township. Some of these lands are permanently protected as open space, and these will be noted.

The acreage numbers within this section of the report come from the property lists in the Appendix. The accompanying *Open Space Map* details the location of these properties and has been developed using the Geographic Information System software Arcview 3.2. As noted on the *Open Space Map*, Vargo Associates produced the base map. Franklin Township's Tax Assessor's office supplied the property list information. Some of these lands may have structures or otherwise developed. Vacant lands or outdoor recreation sites will be noted. Publicly owned property often represents opportunity for open space preservation.

Public Land

Federal Land

There is no federally owned land in Franklin Township.

State Land

Department of Human Services

The Department of Human Services owns 3 acres of land in southern Franklin Township (*Class 15F in the Appendix*). This triangular three-acre parcel once formed the tip of a 153-acre Human Services holding, the balance of which was in Buena Borough. This site contained the Vineland Development Center, a resident facility for people with severe developmental disabilities. In 1984, Buena Borough purchased 100 acres of the original Human Services holding for a Borough park. The Vineland Development Center in Buena Borough is now discontinuous from the Franklin piece, although they have a common owner. The 3-acre property in Franklin is not being actively used as part of the state run residential facility.

New Jersey Natural Lands Trust

New Jersey Natural Lands Trust owns four properties in Franklin Township totaling **74 acres** (*Class 15C and 15F in the Appendix*). Two of the properties, known as Black Acres Preserve are adjacent to the south side of the White Oak Wildlife Management Area. The Preserve is about 95% forested wetlands, containing stretches of

White Oak Branch. The properties became Trust land in 1997 through a landowner donation.

The third site is the Tuckahoe Preserve on the east side of Tuckahoe Road. It is also a wetland forest, and was purchased through the Limited Practical Use Program. This program, unique to the Pinelands, allows for state purchase of private land subject to strict environmental regulation. This property has severed its Pinelands Development Credits. The Tuckahoe Preserve provides good habitat for barred owl and several migratory birds.

The Manaway Branch Preserve, the final Trust property in Franklin, was acquired in 1994 also through a landowner donation. The property sits on the Manaway Branch, which forms part of the northern border of Newfield Borough. The Preserve is marshland and forested wetland, providing suitable habitat for nesting and migratory birds (*New Jersey Natural Lands Trust, personal communication*).

Department of Transportation

NJ DOT owns one parcel in Franklin Township, at the corner of Delsea Drive and Dutch Mill Road. The parcel is ½ acre (*Class 15C in the Appendix*).

Department of Environmental Protection, Division of Fish and Wildlife

The White Oak Wildlife Management Area contains **1,522 acres** in Franklin Township (*Class 15C in the Appendix*). The Management Area extends east into Monroe Township for a total of about 2,000 acres. The first parcels of land for inclusion in the Management Area were purchased in 1998. The Wildlife Management Area was established primarily for open space preservation in southern New Jersey. After it was established threatened species, such as barred owl and Coopers hawks were found to reside on the property. Current management priorities include posting the Management Area's boundaries and opening up access to the Area via Whitehall Road, which is currently impassable in Monroe Township. There are plans to increase the Area's size and acquisitions are being considered in Franklin (*Lee Widjeskog, Regional Superintendent, February 2002*).

County of Gloucester Land

Gloucester County owns 354 acres in Franklin Township (*Class 15C in the Appendix*). Scotland Run County Park comprises **311 acres** in northeastern Franklin Township, and extends into Clayton Borough and Monroe Township for a total of 858 acres.

The remaining forty acres of land owned by the County are scattered throughout Franklin Township. The largest of these is a **30-acre** parcel in the southwest part of the Township, adjacent to the eastern border of Newfield Borough. The Gloucester County Board of Chosen Freeholders owns this parcel.

Municipal Land - Township of Franklin

Franklin Township owns a total of 1,221 acres in the municipality (*Class 15C and 15F in the Appendix*). Township parkland includes **726 acres**, or 60% of Township-owned land. This parkland has been preserved as part of Franklin Township's official Recreation and Open Space Inventory (ROSI) filed with the State Green Acres program. Three municipal parks contain land in and around the Township's lakes. These include Malaga Lake Park, Iona Lake and Franklinville Lake. Other park areas include the 222-acre Piney Hollow Preservation Area in the southeastern part of the Township and the Pennsylvania Avenue Little League fields. The remaining municipal parks are smaller and scattered throughout the Township. They are detailed on Franklin Township's ROSI (*Appendix*) and located on the *Open Space Map* in the Maps section.

Franklin Township owns **495 acres** that are not listed on its ROSI. These lots range in size from less than one acre to an 86-acre parcel north of Franklinville Lake. The majority of the parcels are smaller than two acres, however. Some serve municipal needs and some are vacant. The Priority Land Recommendations section of the Open Space and Recreation Plan will detail the possible uses some of these properties may serve as extensions or connections to the existing park system in Franklin Township.

Other Publicly Owned Property in Franklin Township

Township of Franklin Board of Education

The Franklin Township Board of Education owns 215 acres (*Class 15A, 15B, and 15C in the Appendix*). The holdings consist of the Janvier School, whose property also houses the Board of Education offices, Main Road School, Reutter School, and the Delsea Regional High School and Middle Schools. The three elementary schools service Franklin Township students and the upper grade schools service students from Franklin and Elk Townships.

Delsea Regional High School District

The Southern Gloucester County Regional Board of Education owns one 5-acre parcel in the Township. This parcel is located in the southwest part of the Township.

Township of Franklin Fire and First Aid Services

There are a total of 8 acres of land devoted to Fire and First Aid services in Franklin Township. These are spread out over four fire companies and one first aid building (*Class 15C and 15F in the Appendix*).

Private Land

Preserved Lands

The Nature Conservancy

The Nature Conservancy owns three contiguous parcels totaling **29 acres** (*Class 15F in the Appendix*). The land is west of Malaga, on the south side of Harding Highway (US 40). The Nature Conservancy's Franklin Township holdings make up the extreme northern edge of the 1,788-acre Willow Grove Lake Preserve, which is contained in Gloucester, Salem and Cumberland Counties. The Preserve was established in 1994 to protect the habitat of raptors, barred owl and a globally rare moth species. Coyotes are also known to live on the Preserve.

Properties that have severed Pinelands Development Credits (PDCs)

Landowners in the Preservation, Agricultural Production and Special Agricultural Production Areas of the Pinelands are granted Pinelands Development Credits (PDC) based on the size and condition of their land. A landowner can sell his credits to any willing buyer who owns land in a Regional Growth Area of the Pinelands Reserve. The PDC system was implemented by the Pinelands Commission to compensate landowners whose property use had been restricted through regulation. When a landowner sells his development credits the property incurs a deed restriction prohibiting any future residential development of the property.

In Franklin Township's Agricultural Production Area eight owners have severed their Pineland Development Credits (*Pineland Development Credits Table in the Appendix*). Through this method 829 acres of vacant land, farmland, residential land and Unexpected Wildlife Refuge land have been preserved. Two parcels that have severed their PDCs have been subsequently preserved through other state and municipal means. These two parcels are New Jersey Natural Lands Trust's Tuckahoe Preserve and a piece of land included in Franklin Township's Piney Hollow Preservation Area. The *Preserved Land* list at the end of this section includes these two properties as New Jersey Natural Lands Trust property and Township ROSI land, respectively. Thus, the severed PDCs total is less than noted in this section (for a total of **670 acres**).

Farmland Preservation Program

In Franklin Township, **753 acres** have been permanently preserved through New Jersey's Farmland Preservation Program (*see Properties Enrolled in Farmland Preservation Programs in the Appendix*).

Pinelands Density Transfer Easements

In addition to preserved farmland, there are two Pinelands Density Transfer Easements in Franklin. Under this system a landowner who owns less than the requirement to meet the zoning can purchase an easement for the balance from a private party in the same zone. These two easements are located east of Tuckahoe Road, adjacent to White Oak Branch Wildlife Management Area. The total of these easements is **4 acres** and these lands are permanently protected through this program.

Vacant Land - Land with no Structural Improvements

Franklin Township has a total of 4,850 acres of vacant land on 1,323 lots (*Class 1 in the Appendix*).

Farmland

There are a total of 14,871 acres of farmland in Franklin Township (*Class 3 in the Appendix*). In Franklin Township, about **8%** of the total farmland is preserved either through enrollment in the Farmland Preservation Program or through severed Pinelands Development Credits. Thus, **13,609 acres** of farmland are not currently permanently protected in the Township. Of this unprotected farmland, 178 acres in Franklin Township have been put into the Municipal 8-year preservation program. An additional 705 acres are in the State 8-year preservation program (*see Franklin Township Farmland Map in the Maps Section and the Properties Enrolled in Farmland Preservation table in the Appendix*). The 8-year preservation programs require farmers to voluntarily restrict development of their land for a period of 8 years. Although landowners receive no direct compensation for enrollment in the program, they are eligible to receive grants for up to half the cost of conservation projects on their land, such as erosion control, terrace systems and windbreak restoration.

Residential Property - Lots greater than five acres

There are a total of 416 residential lots greater than 5 acres in Franklin Township (*Class 2 in the Appendix*). These lots total **3,587 acres**. About 75% of all residential lots greater than 5 acres in Franklin are between 5 and 10 acres. An analysis of the residential lots greater than 10 acres shows that there are a total of 94 lots and 1,518 acres. The largest residential property in Franklin is 65 acres.

Private Recreational Lands

Franklin Township Youth Soccer Association

The Youth Soccer Association owns **30 acres** in Franklin Township. The property is located on Dutch Mill Road and is used by the Township for soccer games.

There are nine Franklin Township travel teams in the Gloucester County League. The Soccer Association property contains four soccer fields. This property is currently assessed as exempt, vacant land (*Class 15F in the Appendix*).

Sharon Read Development Corporation

The Sharon Read Development Corporation owns 259 acres of land along Scotland Run near the library/municipal building complex. The tract includes a beach, lake, and existing recreational and camping facilities that have been used in the past for outdoor recreation. Of the 259 acres, 223 are assessed as farmland or residential property and included on those property lists in the *Appendix*. The remaining 36 acres are commercially assessed land (*Class 4A*) and residential property. This property is home to the Village Dock campground, a private recreational facility in the Township; the property is identified in the Scotland Run Greenway discussed in the *Land Recommendations Section*.

Girls Scouts of the South Jersey Pines

The Girls Scouts owns 132 acres in the Piney Hollow section of Franklin, between Piney Hollow Road and Victoria Avenue. The property, known as Camp Sacajawea, is used for scout outings, camping, and hiking. This property is assessed as exempt property (*Class 15F in the Appendix*).

Girl Scouts of the South Jersey Pines owns an additional four parcels of land in Franklin Township totaling 440 acres. These parcels are farmland assessed and no recreational facilities exist. Two of the farmland assessed parcels adjacent to Piney Hollow Nature Area have severed their Pinelands Development Credits (384 acres).

Unexpected Wildlife Refuge

Unexpected Wildlife Refuge owns a total of 540 acres, including 161 in Franklin Township (*Class 15F in the Appendix*). The remaining Refuge property is in Buena Borough and Buena Vista Township.

The Refuge is in the Piney Hollow section of Franklin, near the Township's Piney Hollow Nature Area and the Girl Scout property. Unexpected Wildlife Refuge, a 501(c)3 non-profit organization, was founded in 1961. The Refuge offers guided walks along its more than 10 miles of trails and is home to beavers, barred owls and Pine Barren tree frogs. Public access is allowed, but the interested party must first call the Refuge. The Unexpected property has been enrolled in the Green Acres Tax Exemption Program since 1999. The Refuge has severed its Pinelands Development Credits from 112 acres of its holding in Franklin Township.

Cherry Hill Club, Gloucester Sportsmen

The Club owns 153 acres between Coles Mill Road, Whitehall Road and Bluebell Road. The property, which is used for hunting, is assessed as farmland (*Class 3B in the Appendix*). The Sportsmen's property is adjacent to state-owned land in the White Oak Wildlife Management Area.

White Oak Country Club

Adjacent to the White Oak Wildlife Management Area and the New Jersey Natural Lands Trust Preserve, is the 237-acre White Oak Country Club golf course. This is exempt property (*Class 15F*).

Church and Charitable Properties

There are a number of church and charitable properties in Franklin, the majority of which are small and being actively used. Three organizations have large, mostly undeveloped holdings in the Township. These are Congregation Daughters of Mercy (58 acres), Pinegrove Bible Institute (126 acres), and the Diocese of Camden (941 acres).

The three parcels that comprise the Daughters of Mercy's holding are located on Catawba Avenue, between Main Road and the Newfield Borough line. These are exempt properties (*Class 15D in the Appendix*). The Pinegrove Bible Institute's holding, which consists of two parcels, is located on Dutch Mill road between Central Ave. and Main Road, and is also exempt property (*Class 15D*).

The Diocese holding is located in 7 parcels ranging from 15 acres to 306 acres. The parcels are located between Piney Hollow Road and Victoria Avenue south of the Girl Scout's Camp Sacajawea and these are all assessed as farmland (*Class 3B*).

Preserved land in Franklin Township

Franklin Township consists of a total of **36,141 acres**. Of this land, 4,463 acres, or 12%, are preserved either through conservation easement, farmland preservation, or municipal, county, or state ownership. These protected lands are described as follows:

Municipal property listed on the ROSI	726 acres
New Jersey Natural Lands Trust property	74 acres
Gloucester County Parks and Recreation property	311 acres
New Jersey DEP, Fish and Wildlife property	1,522 acres
The Nature Conservancy property	29 acres
Preserved farmland	753 acres
Pinelands Density Transfer Easements	4 acres
Severed Pineland Development Credits	670 acres

Total Preserved Lands: 4,463 acres

Franklin Township Open Space Inventory

The Open Space Inventory is the list of lands in the municipality that the Township should look towards when planning for open space preservation. This list is comprehensive and includes property that is not traditionally thought of as “open space.” In order to increase the amount of preserved land within the municipality, the Open Space and Recreation Plan recommends that Franklin utilize a diverse inventory of lands to begin to prioritize properties for acquisition. This inventory* includes:

Vacant Land	4,850 acres
Residential properties greater than 5 acres	3,587 acres
Municipally owned properties not included on the ROSI	495 acres
County owned land not part of Scotland Run Park	30 acres
Farmland	13,609 acres
Private Recreation Sites	504 acres
Tax Exempt Church sites greater than 10 acres	184 acres

TOTAL ON INVENTORY 23,246 acres

Of the 36,141 acres in Franklin Township, **23,246** are included on the inventory of available open space. Thus, nearly two-thirds, or 64%, of the Township is potentially available for open space preservation. Over half of this potentially available land is farmland-assessed property.

**Note: These parcels may have structures on them.*

Outdoor Needs in the Township of Franklin

"Franklin Township is a large rural municipality. We are experiencing growing pains as more and more people desire to live in the country but expect all the luxuries and activities available in more developed areas."

Carol Coulbourn, Franklin Township Clerk

Recreation Demand Exceeds Available Space

Franklin Township offers a variety of recreational activities for its residents. Organized programs include baseball, softball, basketball, in-line roller hockey, football, soccer and wrestling. The Township's beaches, lakes and parks provide facilities for swimming, boating, walking, jogging, and children's playgrounds. Facilities include fields owned and maintained by the Township, the public school system, and privately owned soccer fields. The following chart lists the participation in Franklin's recreation programs that require outdoor fields or facilities.

<u>Activity</u>	<u>Age Groups Served</u>	<u>Number of Participants</u>
Baseball	Ages 5 to 15	650
Soccer	Ages 4 to 9	650
Football	Youth	110
In-Line Hockey	Youth to Adults	230

Recreation programs that utilize indoor facilities include the following:

<u>Activity</u>	<u>Age Groups Served</u>	<u>Number of Participants</u>
Wrestling	Youth	100
Basketball	Youth	335
Bus trips	Senior Citizen Club	280

The number and type of outdoor recreational facilities for the above sports includes:

<u>Type of Facility</u>	<u>Number</u>	<u>Location</u>
Football	2	Delsea Regional High School
Baseball	9	
Soccer	11	Franklin Township Youth Soccer Association

The fields are fully booked, but the Township and Soccer Association are able to keep up with maintenance and care of the grounds. The conditions of the fields are good and are not yet suffering from overuse or stress.

Volunteers coach the youth teams and the Township and schools share recreational space. Baseball, football, and soccer use both Township fields and school owned fields. *"Franklin Township is fortunate to have outstanding cooperation between*

our schools and municipality in our recreational activities. We are also blessed to have tremendous volunteers that spend countless hours coaching our children," Carol Coulbourn, Township of Franklin Municipal Clerk.

The Township recognizes that existing field space is just meeting existing recreational use and is being outpaced by the increasing numbers of participants. Acquisition of new field space is a priority for the community and the Township would like to own some additional soccer fields. In trying to answer the increasing demand for playing time, the Township does have a few fields that are lit for evening practice and games. If there is an evening soccer match, they can use the football field, which is lit, at the Regional High School. Of the nine available fields for Little League in the town, three are lit in the evening.

In-line skating for roller hockey is a sport quickly gaining popularity in the community. There is one existing outdoor rink for roller hockey – used by both formal youth leagues and an informal adult hockey league. It is located on Pennsylvania Avenue and is a lit facility. The Township would like to see another rink constructed for this sport and see it as an opportunity to share facility cost and construction with their neighboring communities. Over 20% of those children participating in the roller hockey league in Franklin Township, live outside the town.

Biking – both motorized and non-motorized – are rapidly becoming popular sports for residents. Recently, there has been increased attention to providing bike tracks for off-road vehicles to help deter them from driving on private land in their communities. This type of activity has become a problem for municipalities in areas throughout the state and there is a recognized need to address this problem. It is a serious issue in Franklin Township, and perhaps providing a safe area for them to ride would alleviate the stress placed on the Police Department and the environment.

Beaches are a Hidden Treasure

Franklin Township owns three beach and lake facilities: Malaga Lake, Franklinville Lake and Iona Lake. Residents use these facilities for swimming, picnicking (there are both tables and grills), fishing and boating. There are small playgrounds available for children to use. Lifeguards are posted seasonally at Township beaches. There is no organized swimming program offered to residents. Franklin does not anticipate expanding the facilities offered at the beaches, but sees them as beautiful places for families to use and enjoy.

Trails and Recreation Areas Link People to Nature

White Oak Wildlife Management Area and the Township and County parks offer recreational opportunities for the community to explore and enjoy their surrounding natural environment. Both the state and county have both formal and informal trail networks on their properties.

Public access is allowed on the White Oak Wildlife Management Area. No formal trails have been constructed by the state, but an existing network of informal trails provides some means of recreation. Presently there are no visitor-use facilities at the Management Area.

The largest of Gloucester County's parks, Scotland Run Park also features 70-acre Wilson Lake, located in Clayton Borough and Monroe Township. The north side of the lake has a fishing pier and boat launch. Two miles of hiking trails are available with an additional mile to be completed by 2003. A significant amount of the park is wetlands, and is not open to public recreation. Park officials hope to begin a management plan in the near future, which would entail fostering the succession of old farm fields to forest. A large part of the Franklin Township section of Scotland Run Park was farmland prior to its inclusion in the park.

A staffed nature center, located across Clayton Williamstown Road from Wilson Lake, operates out of the park. The nature center offers seasonal programs and guided walks of all types. These include bird walks, night ecology walks, and wildlife walks. The nature center also accommodates trips from local schools for nature lessons. The nature center also serves as the meeting place for conservation groups, including the Upper Maurice River Watershed Association, the Federation of Gloucester County Watersheds, South Jersey Land Trust, and the Alliance of New Jersey Environmental Educators.

Every June, Water Fest, sponsored by the Upper Maurice River Watershed Association, is held at Scotland Run Park. The focus of the day-long event is to bring a greater understanding to the community of the importance of maintaining the water quality of the Upper Maurice River Watershed. Water Fest includes musical performers, information booths and hands-on educational activities for children.

Bringing the public "outside" is an integral aspect of the open space program. Connecting people to their local environment fosters stewardship and an increased effort to protect their local environs. Activity abounds at the existing recreation areas, and opportunities exist for establishing current links through the creation of expanded trails, bikeways and corridors of "green" through the community from park to park.

Drinking Water Supply Relies on Aquifer Recharge Areas

Franklin residents depend wholly upon private well water for their needs. To ensure the quality and quantity of available groundwater, steps should be taken to protect the critical recharge areas of the aquifer, such as upland forests and along watershed divides. It is in these areas that the sandy soil is most conducive to high recharge rates.

There have been reports of well contamination at locations throughout the Township, highlighting the need to safeguard the Cohansey Aquifer. Containing 17 trillion gallons of water, the Aquifer holds "enough water to cover the entire state to a

depth of 10 feet” (*NJ Pinelands Commission E*). The Aquifer is nationally renowned for its pure waters and productivity.

This productivity is also what makes it susceptible to pollution. Pollutants move quickly and easily through the sandy soil into the ground water. By maintaining productive recharge areas in the Township as open space, the aquifer will continue to be productive while pollutant infiltration will be minimized (*Township of Franklin Master Plan p. 42*).

Upland Forests need Protection from Encroaching Development

Upland forest areas in Franklin Township contribute to groundwater recharge. These upland areas are well-drained, affording precipitation a better rate of infiltration to the groundwater. This is an important consideration for Franklin Township as residents depend wholly on groundwater for their needs.

In addition to conservation, upland forests also provide the Township with quality options for recreation sites. Large portions of Franklin are wetlands, limiting their use for trails or recreation fields. To accommodate future growth Franklin will need more recreation sites for both passive and active uses (*Township of Franklin Master Plan p. 64-65*).

Upland areas are also the most attractive to developers. In 2001, Gloucester County showed a 22 percent increase in building permits, mainly clustered in southern Gloucester County (*Daily Record, p. A3*). As development nears Franklin land values in the Township will rise, making the acquisition of upland areas less feasible. Devising a strategy of protecting these crucial lands now will save Franklin time and money in the long run.

Non-point Source Pollution Runoff Threatens Water Quality in Streams

Streams carry discharge groundwater as well as surface water runoff, which often carries with it non-point source pollutants. Non-point source pollution is that which originates from no single output, such as an effluent pipe or a smokestack. Non-point source pollution may take the form of lawn chemicals, agricultural pesticides or automotive products. Franklin Township’s streams traverse a fair amount of farmland and commercial areas, making them susceptible to non-point source pollution.

Franklin’s stream corridors are associated with wetlands, which act as sponges during times of flooding. Wetlands also serve as the interface between surface and ground water. The stream corridors are home to wildlife and contain good wildlife habitat. Riparian buffers could help mitigate the amount of pollutants that reach waterways, allowing runoff to enter the ground for filtration before entering the stream and wetland corridors.

Franklin Township has identified its lakes as important resources for its residents. The Township Master Plan states that “every effort should be made to prevent . . . storm water runoff from directly entering the lakes of the Township” (p. 76). Since the lakes are fed by the streams, protecting the lakes also means protecting the streams. Riparian buffers can accomplish this.

Wildlife Habitats are Fragmented

Franklin contains a large amount of forested land, which supports a diverse wildlife community. However, fragmentation has occurred across Franklin’s landscape, decreasing the total benefit of the individual patches of habitat. From the stream corridors in the northwest to the central woodlands, and on to the large forested areas in the Pinelands, Franklin contains commercial centers, residential developments, roads and agricultural land uses. The connection of significant areas of forested land and other suitable habitat to one another through corridors, or greenways, will benefit wildlife by allowing greater mobility and genetic exchange, which are vital for healthy populations.

The Nature Conservancy has established a large preserve from Franklin Township into Pittsgrove. In addition to the land currently contained in the Willow Grove Lake Preserve, the Nature Conservancy has established a Site Design boundary, which delineates the maximum desirable size of the Preserve to protect critical habitat. If all the land within the boundary were protected, the Preserve would grow by 536 acres. In Franklin the Site Design boundary extends north to Iona Lake, and east along Harding Highway towards Malaga (*Jay Laubengeyer, Nature Conservancy, March 2002*).

Encroaching Development from Neighboring Communities Threatens Rural Landscape

Franklin Township’s sense of place is its rural character. With a landscape comprised largely of forests, wetlands, farm fields and low-density development, Franklin’s heritage is its abundant natural resources.

According to an informal survey conducted at Franklin Township’s 2001 Community Day, greater than half of the 75 respondents said they moved to Franklin “to live in the country.” 25% reported that what they like most about the Township is that “it isn’t developed.” Another 12% said they liked Franklin because it “doesn’t look suburban.” When asked about the future of Franklin Township 58% reported that Franklin should “stay the way it is now.”

Steps should be taken to insure that development doesn’t destroy the fabric of the Franklin Township community. As growth encroaches upon Franklin from the north development pressure will be exerted upon the Township’s non-preserved open spaces. Land values will rise, making preservation a more costly—and less feasible—alternative.

Open space should be acquired now to help shape future development and to protect vistas and natural areas crucial for the retention of Franklin's character.

Agricultural Lands Risk Becoming Isolated

Agriculture played an important role in Franklin Township's historical development. It continues as a dominant land use today, contributing to the community's rural character. The present agricultural lands stand at risk of becoming fragmented through development. According to the Township of Franklin Master Plan, "The lands best suited for farming have been subjected to development pressures" (*page 84*). Already cleared, farmland is more economical to develop.

Agricultural districts could be established in areas that are well-suited for farming. This could not only help preserve the rural character of Franklin, but also help keep agriculture viable in the community. Both of these goals have been articulated by the Franklin Township Open Space Committee. By establishing areas where farming is to be the dominant land use, economically viable agricultural operations will occur. Franklin Township's Right to Farm ordinance and its requirement that developments around active farmland contain a buffer will help with this plan.

A System of Open Space in the Township of Franklin

"Plans are the dreams of the wise."

German Proverb

Open space is an infrastructure that needs to be designed and planned just as utilities and roadways. When planned as a system, this infrastructure provides many benefits to a community. The Township of Franklin has a rich agricultural heritage and a strong sense of community among its residents. The Open Space and Recreation Plan includes a Greenway Map (*in the Map Section*) for the Township of Franklin proposing corridors and links of preservation for the municipality. A greenway is one way of having open space work as a system in the Township.

Natural lands and recreation space provide the following functions that promote a healthy, vital community.

- Protects the quantity and quality of drinking water
- Preserves habitat for living resources, including plants, animals and humans
- Prevents erosion and conserves soil, a nonrenewable resource
- Contributes to landscape diversity and a scenic environment
- Controls flooding
- Preserves renewable resources that may be used for energy conservation
- Offers a variety of outdoor recreation experiences
- Provides opportunities for residents to keep fit and improve physical health
- Aids in promoting a sense of community
- Balances growth and development to sustain economic vitality in the community
- Connects current residents to the community's heritage by preserving historic landmarks and sites.
- Maintains a community's character

A system of open space will achieve these benefits for the Township of Franklin. The Township can add to existing protected lands to create a viable open space system.

Waterways Cloaked in Green Preserves Integrity of Headwaters

Establishing greenways along the streams in Franklin will protect the waterways from storm water runoff and pollutants. It will also provide habitat for plant and wildlife species. The waterways in Franklin are all headwater streams for either the Great Egg Harbor River or the Maurice River, both of which are designated Wild and Scenic Rivers in their lower reaches. The protection of water quality in headwater regions of a river system is of paramount importance for the total health of the river. No action occurring in the headwaters can be prevented from affecting the whole system. Waterways will be safeguarded and protected using a system of conservation practices and land protection.

Greenways Promote Public Appreciation and Use of Township Waterways

Franklin Township's lakes are an important community resource. Several lakes in the Township are located near town centers, affording residents excellent access. By establishing greenways along river corridors, Franklin can promote recreational use of the waterways. Greenways along river corridors could connect people to the outdoors. A greenway system allows an opportunity for the public to learn through experience the importance of the Township's streams, floodplains, wetlands and open space.

The Franklin Township Master Plan (*p. 66*) states that “[b]y providing walkways or paths within [stream corridors], public recreational use could be introduced in the form of interpretive trails.” Coupled with protection of the waterways from storm water runoff, greenways could greatly enhance the protection of Franklin Township's waterways, while at the same time promoting their use.

As part of the greenway plan a system of canoe and kayak access points could be established along the Township's waterways. By allowing low-impact recreational use of the waterways a wider group of citizens would be able to learn about the importance of Franklin's streams and wetlands. The users would be able to see first hand the wildlife contained along stream corridors. This approach to educating residents of the importance of buffering waterways will provide a deeper appreciation for the aquatic resources within Franklin Township.

Greenways Sustain Healthier Plant and Animal Populations

Franklin contains a large amount of forested land, which contains diverse wildlife habitat. However, fragmentation of these woodlands threatens the health of wildlife species residing in and migrating through these lands. From the stream corridors in the northwest to the central woodlands, and on to the large forested areas in the Pinelands, Franklin's landscape is broken by commercial centers, residential developments, roads and agricultural land uses. By connecting the major areas of forested lands and other suitable habitat to one another through corridors, or greenways, wildlife will benefit by having greater mobility and greater diversity of communities. Park managers and private land trusts holding land in the Township have proposed designs and boundaries to establish permanently preserved corridors in and through the Township.

Both the New Jersey Division of Fish and Wildlife and the Nature Conservancy have expressed an interest in expanding the size of their holdings. This would be done specifically to maximize the wildlife benefit of their lands. The Nature Conservancy is interested in seeing its Willow Grove Lake Preserve grow to encompass the Site Design, which is the delineation of the maximum desirable size of the Preserve. New Jersey Fish and Wildlife is interested in acquiring large, contiguous parcels of land to add to the White Oak Wildlife Management Area. There are several parcels in the eastern section of Franklin Township which would be appropriate for this purpose.

A Central Park Will Answer the Growing Community's Needs for Active Playing Fields

Franklin Township currently meets the standards set forth by the National Recreation and Park Association concerning number and type of recreational facilities (*Township of Franklin Master Plan, p. 64*). However, of the recreational facilities used by Franklin Township residents, few are actually municipally owned. Many active recreation fields are owned by Private entities, the Franklin Township Board of Education and Regional Board of Education. According to the Township Master Plan, the actual recreation needs of the Township should be monitored because of the ownership situation. "In the event of conflicts arising as people compete for use of facilities, the need for additional facilities may grow" (*p. 65*).

By developing Township-owned active recreation facilities, Franklin can relieve the pressure that exists from owning so few of its own facilities. This will become even more imperative as Franklin grows in population in the coming years.

A System of Interconnected Multi-use Trails Connecting Township Parks and State Lands Will Bring the Community Outdoors

A system of multi-use trails through Franklin Township would allow more people to experience the preserved land in Franklin. With important access points in mind, the trail system could be designed in such a way that it promotes use by residents who might otherwise not experience the Township's park lands. The trail system could also be used for commuting to and from town centers, such as Malaga and Franklinville.

The Franklin Township Master Plan asserts that "trails could be used to provide linkages between lakes and parks in the Township system. By reserving . . . linkages between park lands, a network of natural green belts would be preserved which would help to perpetuate the natural character of Franklin Township" (*p. 66*). The trail system could be designed—in appropriate areas—in conjunction with a system of wildlife corridors, thereby increasing the utility of the trail system. Utility lines and rights-of-way could also be used for the establishment of a trail through the Township.

There is a railroad line running north-south through the Township. The rail line connects Malaga and Franklinville and their preserved areas. If the railroad bed is abandoned by its present owner, it would represent an opportunity to establish a Township trail connecting residents to the municipal park system.

Historic Sites Preserve the Rural Heritage of the Community

A system of open space preserves not only the community's natural assets, but protects the legacy of the town. Defining the historic sites and regions of the Township will guide the open space program to include not only the landscape, but the heritage of the community.

Many historic and pre-historic sites occur throughout Franklin Township. Sites include the Porchtown Methodist Church, Franklinville Inn and several Native American sites. The Route 47 corridor is the area in which industry first came to Franklin. This is also the area that remains the most economically productive. Despite the abundance of historic resources in the Township, no sites in Franklin have been listed on the state or federal Register of Historic Places. The listing of a site confers several benefits upon that resource. By establishing historic districts and applying for sites to be included on the State and Federal Registers of Historic Places Franklin can ensure the physical survival of its cultural heritage. The establishment of registered historic sites will complement the existing mosaic of natural preserves—especially around the Township’s several historic lakes.

Agricultural Districts Ensure Franklin’s Rural Economy

Agricultural preservation will protect and preserve the economic viability of the local farmer and the rural beauty of the community. By promoting the preservation of farmland Franklin would be taking important steps toward ensuring the continued existence of agriculture in the Community. Farmland preservation could also be accomplished through the severance of PDCs in the Pinelands Area of the Township.

In addition to working at the individual level, farmland preservation and promotion could be accomplished at a larger, more regional level. The establishment of Agricultural Zones or Districts within the Township would delineate areas where agriculture is the dominant land use. This, in addition to existing right to farm laws, would help prevent conflicts between development and agriculture. Further, the congregation of agriculturists within the Zone would encourage the sharing of information.

Forest stewardship will enhance forest protection

Many properties in Franklin Township are managed as woodland farms, which incorporate woodland management plans. In order for a farm to qualify as a woodland management farm for the State Farmland Tax Assessment Program, the landowner must have a woodland management plan describing the forest resource and how the owner will manage his woodlands over a minimum ten-year period. The farm must also generate \$500 per year for the first 5 acres and \$.50 per acre for each acre above that first 5 acres.

The United States Forest Service also has a federally sponsored program called the Forest Stewardship Program. This offers landowner recognition for non-commercially owned properties where the landowner has a woodland management plan that also recognizes and manages the wetlands, wildlife, aesthetic value, soil and water in addition to the woodlands on the property. This program, when fully funded, also offers landowners cost-share initiatives to allow the landowners to fully follow the guidelines in their woodland management plan. In New Jersey, the State Farmland tax program and the U.S. Forest Service program have merged to allow one planning document for the

landowner where the stewardship plan meets the state tax code and eliminates conflicts between the two.

Franklin Township does have landowners that are enrolled in the Forest Stewardship Program. Increasing enrollment of farmland owners in this merged state-federal program will ensure increased protection of the natural resources for an extended period—the minimum is a ten-year management plan. This does not ensure preservation of the land in perpetuity, but it does allow recognition of the importance of the land value and stewardship of the property for a longer period of time.

Action Program and Recommendations

“Every effort should be made to prevent septic effluent and storm water runoff from directly entering the lakes of the Township.”

Township of Franklin Master Plan, p. 76.

The Action Program suggests projects that the Township should pursue to implement the Open Space and Recreation Plan. The activities listed for the first year after the adoption are the most urgent and will further Franklin Township’s Open Space program immediately. The “three year” recommendations are very important but will take some time to complete. The “five year” projects are important, but should take place in the appropriate time frame, as opportunities arise. The Open Space and Recreation Plan is not a static document. The Action Program should be updated every year, and progress should be reported to the governing body.

First Year

- Adopt the Open Space and Recreation Plan as an amendment to the Township of Franklin Master Plan.
- Submit the final Open Space and Recreation Plan to Green Acres for the State’s Planning Incentive Program.
- Review and Prioritize the properties highlighted in the Open Space and Recreation Plan. Visit the properties and decide which one(s) to submit for county and state preservation funding.
- Prepare at least one application per year for the Gloucester County Open Space and Farmland Preservation Trust.
- Identify potential sites for a central park.
- Establish a systematic outreach program to farmland owners about farmland preservation, including information on State and county preservation programs.
- Contact the Nature Conservancy to discuss joint projects to protect critical habitat within their Willow Grove Lake Site Design.
- Meet with the Gloucester County Planning Board to discuss the expansion of bike trails through Franklin Township.
- Contact NJ Division of Fish and Game to discuss common acquisition priorities.

Within Three Years

- Initiate communication with the Diocese of Camden regarding the plans for their large holding (941 acres) in Franklin Township.
- Identify potential sites for a central park.
- Begin discussion with Board of Education about placing conservation easements on their land in the greenway corridors, and in other environmentally sensitive areas.
- Establish an outreach program to landowners in the Pinelands' Agricultural Production Area to encourage farmland preservation by various techniques.
- Work with private non-profit landowners to place conservation easements on their property.
- Acquire land adjacent to the Township's waterways to protect the watershed and increase the protection of the waterways from runoff and non-point source pollution.
- Acquire land in areas of the Township that are important to the recharge and protection of Franklin Township's groundwater supply.
- Pursue the acquisition of land around the Township's lakes in order that public access can be protected.
- Meet with adjacent municipalities to discuss open space objectives and common programs and goals.
- Examine Township owned properties and consider placing them on the Recreation and Open Space Inventory for permanent protection. A list of these properties is included in the appendix.
- Re-visit the Township's plans for municipal sewer and water. Update the Open Space Plan to reflect the plans of the Township.
- Contact the Girl Scouts regarding their plans for two parcels of farmland adjacent to the Piney Hollow Preservation Area. The two parcels, which have severed their PDCs, total 384 acres.
- Enact a system of critical areas ordinances to protect, at a minimum, wetlands, stream corridors and recharge areas. This should be done in concert with the environmental commission.

- Develop a strategy to accommodate growth in Franklin Township while preserving the rural character and integrity of the community.
- Work with neighboring municipalities to coordinate and enhance the above ordinances.

Within Five Years

- Discuss the preservation priorities of other non-profits active in the area to form partnerships.
- Pursue the listing of Franklin Township's historic sites on the state and federal registers. There are several sites in Franklin that are eligible for inclusion, but to date none have been listed.
- Review the Open Space and Recreation Plan yearly to update the properties and information, and submit the update to Green Acres.

Preservation Tools and Funding Sources

This section is a listing of the tools and funding sources available to preserve open space. It is not an exhaustive listing, but it includes the most commonly used and most successful techniques.

Preservation Tools

Fee Simple Acquisition

Usually, the most expensive way to preserve property is direct acquisition through fee simple. The title to the property changes hands from one owner to another. A disadvantage to this approach is the need to have the full purchase price available at the closing. Government agencies may not be able to raise the funds in time before an owner decides to sell the property to another buyer.

Municipal Preservation Tools

One preservation tool at the disposal of the municipality is tax foreclosure. If a parcel falls under Franklin Township's ownership through tax foreclosure, the municipality may want to consider holding the property as part of its lands for recreation and conservation purposes if it falls within an identified greenway corridor. Periodic examination of properties with tax liens upon them may also yield opportunities for the municipality to purchase the lien and preserve the land for environmental or recreational uses.

The Township may want to develop educational materials that target large property owners to describe various financial approaches to preserving land. For example, some owners may want to work out an arrangement where they sell blocks of their land over time to the Township or some other preservation partner. Other landowners may sell their land to the Township at a bargain sale to receive deductions for a charitable contribution on federal income tax. Donations of property may also be considered charitable contributions. Leasing arrangements with the owner allows the municipality to purchase the property and lease it back to the owner. This arrangement works when the property is not needed for immediate public use. Owners who want to remain on their property can sell a life estate. All of these techniques accomplish the Township's goal of retaining large properties without the prohibitive expenses of direct acquisition.

Less Direct Acquisition: Easements

Another effective tool for preserving land is an easement. An easement grants an entity the right to use another's property for a specific purpose. There are many kinds of easements designed for many purposes. Easements most appropriate for land in the Township of Franklin include:

- trail easements: the right to traverse a specific path through a property
- scenic easements: the right to maintain a view and ensure that view is maintained
- conservation easements: purchases the development rights to a property to preserve the natural landscape of the site
- agriculture easement: purchases the development rights to the property to preserve the agricultural use of the site

The advantages of easements include the lower costs to the buyer to acquire a particular use on a piece of property. Conservation easements generally cost from 70% to 80% of the fair market value of the land. Trail easements may be used appropriately to create greenways along and around water bodies.

Another advantage of easements is that the land remains in private ownership. The Township will still collect property taxes from the owner. The amount and type of easement right that is sold will typically lessen the owner's tax liability.

Written into the deed, an easement will be associated with a tract of land despite an ownership change. Public access is not necessarily a condition for an easement.

Easements can provide a conservation solution for the municipality and the private landowner. They represent a flexible tool that can be written to satisfy public uses as well as a private landowner's needs.

Bonding

The municipality can issue bonds to borrow money to pay for acquisitions. The funds from the Open Space Trust could be used for the 5% down payment to issue the bonds as well as the debt service over time. General obligation bonds require voter approval and can impair the tax credit of the municipality. The consistent, dedicated revenue from the Open Space Trust make revenue bonds an attractive alternative, but these bonds typically have a higher interest rate than the general obligation bonds.

Installment Purchases

For large purchases of land, the municipality may work out an arrangement with a landowner that allows an incremental purchase over time. The property owner receives the purchase price over time as well as interest on the unpaid, negotiated balance. Funds from the Open Space Trust can be committed for this payment. This arrangement may result in tax benefits for the seller, and the Township is not obligated to pay the full price of the land in one payment.

Lease-Back Agreement

If the land is not needed for immediate use, the Township can purchase a piece of property and lease it back to the owner or another entity for use. Partial reimbursement of the purchase price can be repaid through rental fees, and maintenance costs are

reduced. A variation of this technique is the use of life estate rights. The Township would purchase a piece of property and allow the seller to continue to live on the property for a specified amount of time or until death. This technique is most useful when the Township identifies an important tract and wants to ensure its availability in the future. The landowner may realize estate tax advantages through these methods.

Donation/Bargain Sale

Selling land to a nonprofit organization or to a municipality will provide tax advantages to the owner. Landowners who own property that has escalated in value may reduce their capital gains liabilities through donating the property or selling it at a bargain sale or less than the appraised value. Estate taxes may also be reduced with proper planning. Conservation easements are effective tools for estate planning. The Township may want to discuss land priorities with a nonprofit land trust. The land trust can contact owners to discuss general tax advantages to donations and bargain sales. This is a cost effective method of obtaining open space.

Long-term Lease

The Township may be able to negotiate a long-term lease with a landowner unwilling to transfer complete ownership. This method may be a useful option for trail easements or athletic fields. The Township will have to weigh the cost advantages of long-term rental payments to outright acquisition costs.

Eminent Domain

The Township has the right to condemn and acquire privately owned property for a public purpose. This technique should be considered only when negotiation options have been exhausted. The cost of the property is likely to be considerably higher than a negotiated price because of increased legal fees and the court determination of the land value.

Zoning

Open space benefits may be achieved through the use of municipal tools, such as cluster zoning. This technique allows the same density on a tract of land but reduces individual lot sizes. It can be an attractive incentive to developers since they will spend less on construction and infrastructure costs. The remaining land becomes dedicated open space at no cost to the municipality. The dedicated open space resulting from cluster zoning should be monitored to ensure the open space values are maintained. If these lands are not under conservation easement restrictions, the Township should consider that action. Any open space dedicated as part of a developer's agreement should be placed under a conservation easement. The Township may also want to require the establishment of an endowment or trust supplied with funds to be used to maintain the easement.

Protective zoning is a tool used to limit development in environmentally sensitive areas, such as aquifer recharge zones, wetlands, steep slopes, stream corridors, and natural and historic sites.

Funding Sources

To accomplish all of its open space goals, the Township of Franklin will have to seek funding support from a variety of sources.

Nonprofit Land Conservation Organizations

Nonprofit land conservation organizations are eligible for nonprofit grants from the State Green Acres program. Nonprofit grants may total \$500,000 and require a dollar for dollar match. Land trust associations are good partners for land acquisition in the sensitive and natural areas in the Township. These organizations have experienced staff knowledgeable about benefits to a landowner interested in preserving property as well as strategies for open space preservation. Nonprofit land trusts can also “sign on” to the Township’s Open Space Plan registered with Green Acres. This process makes nonprofits eligible for Green Acres’ funding to acquire land important to the Township.

Historic Preservation

A total of \$6 million a year is available from the State Green Acres program for historic preservation projects. Matching historic preservation and open space goals promotes access to this funding.

The Crossroads of the American Revolution project is another State initiative to identify, preserve and document Revolutionary War sites. If the Township of Franklin has sites of Revolutionary War significance, this effort may result in resources available to the Township. The National Park Service is developing this project and can aid the Township in identifying sites of Revolutionary War significance.

State Land Management Agencies

The State is a likely partner to help the Township protect large resources. The New Jersey Division of Parks and Forestry and the Division of Fish and Wildlife have access to Green Acres funds. The Green Trust, source of Green Acres funds, includes funding for historic preservation, farmland preservation, and public parkland acquisition. Almost a third of the public parkland allocation goes to state land-managing agencies with the rest to municipalities and nonprofit organizations. The Township needs to share its open space priorities with the State land managers and make a case for State acquisition of large sites.

This is important for Franklin Township. The state has indicated its intentions of expanding its holdings in the White Oak Wildlife Management Area. Efforts should be

coordinated to ensure that any parcels bought by the state are consistent with Franklin Township's open space goals.

New Jersey Green Acres and State Agricultural Development Committee

The state is under a 1998 mandate to protect one million acres of open space and farmland over a period of ten years. The Green Acres program provides funding assistance for the acquisition of township park and recreation areas listed in the Open Space and Recreation Plan. Through its Planning Incentive Program Green Acres will provide a grant that will cover 50% of the land acquisition costs of a particular tract.

The State Agricultural Development Committee (SADC) operates similarly to Green Acres. SADC provides funding for farmland preservation, and farmland enhancement projects. SADC coordinates its operations at the state, county, and local level.

Forest Legacy Program

The Forest Legacy Program is administered by the United States Forest Service and may be an additional source of funding for the Township of Franklin. Large, forested wood lots are eligible under this program. Traditionally, Forest Legacy funding in New Jersey has been focused within the Highlands region, although that may change to include broader areas within the state in the future. Forest Legacy funding in coordination with traditional farmland preservation money may create a significant source of preservation dollars for the Township to preserve large parcels. Municipalities obtain access to these funds through the Green Acres program. Franklin Township has large, undeveloped tracts of forested land that provide critical recharge, water storage, and habitat protection. Management of the wildlife, fish, soils, water resources and aesthetic values of its forest lands will enhance the Township's forest resources and keep these lands in a productive and healthy condition.

Federal Land & Water Conservation Fund

Federal funding from the Land & Water Conservation Fund is channeled through the Conservation and Reinvestment Act (CARA). This is a comprehensive, bipartisan effort to provide money to New Jersey for a variety of purposes including open space acquisition, urban park and recreation recovery, coastal conservation, wildlife conservation, historic preservation, payment in lieu of taxes, and conservation easement/species recovery efforts. Large, environmentally significant areas will be likely candidates for funding and will most likely be distributed through the Green Acres program.

Gloucester County Open Space and Farmland Preservation Trust

Gloucester County residents pay 2 cents for every \$100 of assessed property value to a dedicated trust to preserve land. The Trust raises \$2.4 million a year to be used to

acquire county watershed land and parkland, municipal and nonprofit parkland, and development rights for farmland. The Gloucester County Open Space and Farmland Preservation Trust Fund is a competitive grant program to which municipalities in the County apply for land preservation funding. The County accepts applications on a rolling basis. Franklin Township should apply to this Fund for land acquisition dollars.

South Jersey Land Trust

South Jersey Land Trust is a regional land trust whose mission is to protect and preserve the natural, cultural, and historic heritage of southern New Jersey. South Jersey Land Trust preserves land through fee simple acquisition and conservation easements. The organization also assists state, county and local entities in open space planning, acquisition and management.

The Nature Conservancy

The Nature Conservancy owns 29 acres in the Township, part of a larger 1,788 preserve called the Willow Grove Lake Preserve. The Nature Conservancy's mission is to preserve plants, animals and natural communities that represent the diversity of life on Earth by protecting the lands and waters they need to survive. They have been awarded funds from the Duke Foundation to acquire and preserve endangered species habitat in New Jersey. The Nature Conservancy has identified additional land to be protected in Franklin Township.

As part of the Nature Conservancy's Willow Grove Lake Preserve a Site Design has been established. The Site Design delineates the maximum desirable size of the preserve. There are several hundred acres of unprotected land in Franklin Township within the Willow Grove Lake Site Design.

Stewart Estate Land Trust

This small Trust funds land acquisition in Gloucester, Cape May, Atlantic, Cumberland and Ocean Counties. For eligibility a property must either contain water or be adjacent to water. The Fund was established in the 1950s with the goal of preserving wildlife habitat.

Transportation Enhancement Act (TEA-21)

The U.S. Department of Transportation has established that funding for trail development and enhancement is an eligible expenditure from the Federal Transportation Trust. The amount of funding for these purposes is substantial, and funds for land acquisition are available. A special category of funding is dedicated to enhancement of National Recreation Trails. An eligible project must show that the trail is part of the community's overall transportation system. Funds can be used for facilities such as signage, bike racks, surfacing as well as acquisition of land through easement or fee simple. TEA-21 funding can jumpstart a community's bikeway and walking system.

Environmental Infrastructure Trust

The New Jersey Environmental Infrastructure Financing Program administered by New Jersey Department of Environmental Protection provides low cost loans to acquire open space that will preserve water quality. This program is a partnership between the New Jersey Environmental Infrastructure Trust and Green Acres. The mission of the Trust is to assist in achieving a cleaner and healthier environment by providing low-cost financing for projects that enhance and protect ground and surface water resources, and ensure the safety of drinking water supplies.

Land Acquisition Recommendations

Included in this Open Space and Recreation Plan is a map detailing the Land Acquisition Recommendations listed in this section of the document. The *Franklin Township Greenways Map* illustrates the extended greenways connecting the parklands, natural areas and waterways of the Township. The map provides a vision for Franklin Township's open space preservation program.

There are several options available when preserving open space. Direct acquisition is the most familiar, but may also be the most expensive. The purchaser takes title to the land effecting a transfer of ownership. Other methods of accomplishing a transfer of ownership may include a landowner donation, bargain sale, or an installment purchase (see *Preservation Tools and Funding Sources Section*).

Easements are an alternate way to preserve land. An easement grants an entity the right to use another's property for a specific purpose, such as for a trail or for farmland preservation. When land is preserved with an easement, title to the land remains in the possession of the grantor of the easement. There are several other, more specific means of preservation, all of which are detailed in the *Preservation Tools and Funding Sources Section* of this Plan.

Properties included in the *Land Acquisition Recommendations Section* will not necessarily be purchased for preservation. Inclusion on the Land Acquisition Recommendations list indicates that the specific property falls within one of the designated greenways and that the property has been identified on the Open Space Inventory (see *tax lists in the Appendix*).

There are properties that also fall within the identified greenway, but which are not listed on the Open Space Inventory. Although these properties are not included on the following lists they are potential candidates for some form of preservation.

The following pages outline the blocks and lots of parcels in the open space inventory that would create the several greenways envisioned on the *Greenways Map*. Accompanying the list of specific properties is a summary of the open space significance of the individual greenways as well as funding sources that could be used to preserve the properties.

Iona Lake Park Greenway

Open Space Significance:

This swath of lots is located along Still Run, Reed Branch and the Maurice River in the northwestern corner of the Township. Together they comprise a greenway which protects and buffers the streams and their associated wetlands, while also providing a connection from the existing Iona Lake Park to residents in the northern region of the town.

Potential Acquisition Strategy:

Those properties already owned by the Township of Franklin and not listed on the existing Recreation & Open Space Inventory filed with Green Acres, could be placed on the list; this would preserve the lots in perpetuity. Vacant parcels could be preserved using NJ Green Acres and/or Gloucester County Open Space funds. Farm assessed property could be preserved through Farmland Preservation Programs. Conservation Easements could be pursued for portions of those properties listed as residential, for that part of the property that is undeveloped. Non-profits working in southern New Jersey could also be sourced for funding and preservation assistance.

* Property already preserved as Township Open Space (listed on town's Recreation & Open Space Inventory – ROSI)

Franklinville Lake Greenway

Open Space Significance:

This swath of lots runs the length of the Maurice River from the border of the Township of Pittsgrove in the south to the border of the Borough of Clayton in the north. A greenway through this region would preserve the wetland complex bordering the length of the river as well as Franklinville Lake. The Little Ease Natural Heritage Priority Site also falls within this greenway; preservation would provide protection to a wetland habitat for the Pine Barren boneset, a globally rare plant species. This greenway would also provide a potential 'pathway' connection to Franklinville Lake for residents.

Potential Acquisition Strategy:

Those properties already owned by the Township of Franklin and not listed on the existing Recreation & Open Space Inventory filed with Green Acres, could be placed on the list; this would preserve the lots in perpetuity. Vacant parcels could be preserved using NJ Green Acres and/or Gloucester County Open Space funds. Farmland assessed property could be preserved through Farmland Preservation Programs. Conservation Easements could be pursued for portions of those properties listed as residential. Non-profits working in southern New Jersey could also be sourced for funding and preservation assistance.

* Property already preserved as Township Open Space (listed on town's Recreation & Open Space Inventory – ROSI)

Indian Branch Greenway

Open Space Significance:

This greenway swath encompasses lots situated along Indian Branch. Preservation of this region would enhance the health of the stream and surrounding wetland ecosystem as well as provide a buffer from development. This greenway also provides a connection between existing preserved areas – White Oak Wildlife Management Area and Malaga Lake Park.

Potential Acquisition Strategy:

Those properties already owned by the Township of Franklin and not listed on the existing Recreation & Open Space Inventory filed with Green Acres, could be placed on the list; this would preserve the lots in perpetuity. Vacant parcels could be preserved using NJ Green Acres and/or Gloucester County Open Space funds. Farm assessed property could be preserved through Farmland Preservation programs. Conservation Easements could be pursued for undeveloped portions of those properties listed as residential. For those properties owned by Volunteer Fire Departments, first right of refusal could be obtained in case of sale. Non-profits working in southern New Jersey could also be sourced for funding and preservation assistance.

* Property already preserved as Township Open Space (listed on town's Recreation & Open Space Inventory – ROSI)

Scotland Run Greenway

Open Space Significance:

The Scotland Run Greenway provides a connection between Malaga Lake and Scotland Run County Park. Such a connection would not only allow for the possibility of a trail between existing recreational sites, but also protect Scotland Run and Timothy Lake (Village Dock) along with the wetlands associated with the waterway. The greenway would also protect a great blue heron rookery, located along Scotland Run near Fries Mill Road. Great blue herons are listed as threatened when nesting.

Potential Acquisition Strategy:

Those properties already owned by the Township of Franklin and not listed on the existing Recreation & Open Space Inventory filed with Green Acres, could be placed on the list; this would preserve the lots in perpetuity. Vacant parcels could be preserved using NJ Green Acres and/or Gloucester County Open Space funds. Farm assessed property could be preserved through Farmland Preservation programs. Conservation Easements could be pursued for undeveloped portions of those properties listed as residential. For those properties owned by Township Board of Education, the town could request the right of first refusal in case those properties are put up for sale. Non-profits working in southern New Jersey could also be sourced for funding and preservation assistance.

* Property already preserved as County Open Space, or Township Open Space (listed on town's Recreation & Open Space Inventory – ROSI)

Malaga Branch Greenway

Open Space Significance:

Preservation of the properties in this greenway would protect the Malaga Branch as well as the wetlands associated with it. It would also provide a means (together with the Marsh Lake Branch Greenway) of connecting Malaga Lake Park with property held by Unexpected Wildlife Refuge in the southeastern corner of the Township.

Potential Acquisition Strategy:

Vacant parcels could be preserved using NJ Green Acres and/or Gloucester County Open Space funds. Farm assessed property could be preserved through Farmland Preservation programs. Conservation Easements could be pursued for undeveloped portions of those properties classed as residential. For those properties owned by Church or Charitable Organizations, the town could request the right of first refusal in case those properties are put up for sale. Non-profits working in southern New Jersey could also be sourced for funding and preservation assistance.

Marsh Lake Branch Greenway

Open Space Significance:

Preservation of this greenway swath would protect the Marsh Lake Branch and the wetlands associated with the stream. The Marsh Lake Natural Heritage Priority Site also falls within this greenway and preservation would ensure protection of a wetland habitat for the Pine Barren boneset, a globally imperiled plant.

Potential Acquisition Strategy:

Vacant parcels could be preserved using NJ Green Acres and/or Gloucester County Open Space funds. Farm assessed property could be preserved through Farmland Preservation programs. Conservation Easements could be pursued for undeveloped portions of those properties classed residential. For those properties owned by Township Board of Education, or Church and Charitable Associations, the town could request the right of first refusal in case those properties are put up for sale. Non-profits working in southern New Jersey could also be sourced for funding and preservation assistance.

Open Space Owned by Unexpected Wildlife Reserve or New Jersey Natural Lands Trust

Marsh Lake Natural Heritage Priority Site

Open Space Significance:

Preservation of this area would ensure protection of a wetland habitat for the Pine Barren boneset. It also falls within the Marsh Lake Branch Greenway, which connects Malaga Lake Park with preserved areas owned by Unexpected Wildlife Refuge in the southeastern corner of the Township.

Potential Acquisition Strategy:

Vacant parcels could be preserved using NJ Green Acres and/or Gloucester County Open Space funds. Farm assessed property could be preserved through Farmland Preservation programs. Non-profits working in southern New Jersey could also be sourced for funding and preservation assistance.

Piney Hollow Additions

Open Space Significance:

Preservation of this region would provide an increased buffer to McCarthy's Lake. It would also expand the acreage of preserved land in the region by adding to the Piney Hollow Natural Area. This area is within the Pinelands National Reserve.

Potential Acquisition Strategy:

Vacant parcels could be preserved using NJ Green Acres and/or Gloucester County Open Space funds. Farm assessed property could be preserved through Farmland Preservation programs. Conservation Easements could be pursued for undeveloped portions of those properties classed residential. For those properties owned by Church or Charitable Associations, the town could request the right of first refusal in case those properties are put up for sale. Non-profits working in southern New Jersey could also be sourced for funding and preservation assistance.

* Property already preserved as Township Open Space (listed on town's Recreation & Open Space Inventory – ROSI)

Open Space Owned by Unexpected Wildlife Reserve

White Oak Wildlife Management Area Additions

Open Space Significance:

These lots are located in an area adjacent to the existing White Oak Wildlife Management Area (WMA) and the White Oak Branch and Marsh Lake Branch. Preservation of this area would provide a buffer to the WMA as well as the streams. The lots are also located in the Pinelands National Reserve.

Potential Acquisition Strategy:

Vacant parcels could be preserved using NJ Green Acres and/or Gloucester County Open Space funds. Farm assessed property could be preserved through Farmland Preservation programs. Conservation Easements could be pursued for undeveloped portions of those properties listed as residential. For those properties owned by Church or Charitable Associations, the town could request the right of first refusal in case those properties are put up for sale. Non-profits working in southern New Jersey could also be sourced for funding and preservation assistance.

* Property already preserved as NJ DEP Open Space

Burnt Mill Branch Greenway

Open Space Significance:

This greenway surrounds the Burnt Mill Branch from the border with Vineland City to the edge of the proposed Marsh Lake Branch Greenway. Preservation of this region will provide a stream buffer for the Burnt Mill Branch while also connecting the western portion of the Township with other greenways.

Potential Acquisition Strategy:

Vacant parcels could be preserved using NJ Green Acres and/or Gloucester County Open Space funds. Farm assessed property could be preserved through Farmland Preservation programs. Conservation Easements could be pursued for undeveloped portions of those properties classed residential. For those properties owned by Township Board of Education, the town could request the right of first refusal in case those properties are put up for sale. Non-profits working in southern New Jersey could also be sourced for funding and preservation assistance.

Open Space Owned by New Jersey Natural Lands Trust

Franklinville Lake – Scotland Run Greenway Connection

Open Space Significance:

This greenway connects the Franklinville Lake Greenway with the Scotland Run Greenway.

Potential Acquisition Strategy:

Vacant parcels could be preserved using NJ Green Acres and/or Gloucester County Open Space funds. Farm assessed property could be preserved through Farmland Preservation programs. Conservation Easements could be pursued for undeveloped portions of those properties classed residential. County owned properties are already protected. Non-profits working in southern New Jersey could also be sourced for funding and preservation assistance.

Scotland Run – Indian Branch Greenway Connection

Open Space Significance:

This greenway connects the Scotland Run Greenway with the Indian Branch Greenway.

Potential Acquisition Strategy:

Vacant parcels could be preserved using NJ Green Acres and/or Gloucester County Open Space funds. Farm assessed property could be preserved through Farmland Preservation programs. Conservation Easements could be pursued for undeveloped portions of those properties classed residential. Non-profits working in southern New Jersey could also be sourced for funding and preservation assistance.

RESOLUTION
TOWNSHIP OF FRANKLIN
REQUESTING PLACEMENT OF A NON-BINDING REFERENDUM
FOR ESTABLISHMENT OF AN OPEN SPACE AND FARMLAND
PRESERVATION TRUST FUND ON THE FRANKLIN TOWNSHIP
BALLOT ON NOVEMBER 2, 1999

R-111-99

WHEREAS, legislation has been enacted allowing municipalities to establish an open space fund; and

WHEREAS, the Township Committee of Franklin Township desires to ascertain the sentiment of the voters of the township concerning the funding and establishment of a dedicated open space and farmland preservation fund; and

NOW, THEREFORE BE IT RESOLVED, by the Township Committee of the Township of Franklin, County of Gloucester, State of New Jersey hereby requests the Clerk of Gloucester County to print on the official ballot used in the November 2, 1999 election the following public question and the accompanying explanation:

QUESTION:

Shall the Township Committee of the Township Of Franklin adopt an ordinance establishing an "Open Space and Farmland Preservation Trust Fund" which shall be funded annually through the collection of local real property taxes in an amount equal to one cent (\$.01) per one hundred dollars (\$100.00) of assessed value?

EXPLANATION

The intent of the trust fund is to limit residential sprawl by balancing rural character and responsible growth. The establishment of the trust fund will qualify Franklin Township for double the amount of state funding for such purpose.

The proposed trust fund will be used to acquire land, easements, development rights or other interests in real property for the purpose of preserving open space and for acquisition of farmland for farmland preservation and for payment of debt service on indebtedness lawfully issued or incurred for such purposes. For every \$100,000 of assessed value, the annual tax increase would equal \$10.00.

BE IT FUTHER RESOLVED, that a certified copy of this Resolution be sent to the Clerk of Gloucester County immediately on passage.

ADOPTED, at a meeting of the Township Committee of the Township of Franklin held on Tuesday, August 10, 1999.

TOWNSHIP OF FRANKLIN

BY: 
David Ferrucci, Mayor

ATTEST:

Carol J. Coulbourn, Clerk

CERTIFICATION

I, Carol J. Coulbourn, Clerk of the Township of Franklin, do hereby certify that the foregoing Resolution was presented and duly adopted by the Township Committee at a meeting of the Franklin Township Committee held on August 10, 1999.

CERTIFICATE OF ELECTION

BOARD OF COUNTY CANVASSERS OF GLOUCESTER COUNTY, NEW JERSEY

The said Board does determine that at an election held in the said County, on the 2nd day of November, in the year of our Lord one thousand nine hundred and ninety-nine, the votes cast on the following public question was as follow:

TOWNSHIP OF FRANKLIN

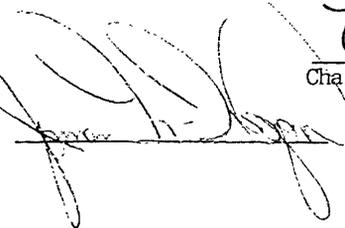

Shall the Township Committee of the Township of Franklin adopt an ordinance establishing an " Open Space and Farmland Preservation Trust Fund" which shall be funded annually through the collection of local real property taxes in an amount equal to one cent (\$.01) per one hundred dollars (\$100.00) of assessed value?

The number of votes cast in the affirmative or yes were 2081

The number of votes cast in the negative or no were 1152

In Witness Whereof, I have hereunto set my hand this 24th day of November, A.D. 1999.

Chairman of the Board of County Canvassers

Attest 

State of New Jersey
DEPARTMENT OF COMMUNITY AFFAIRS

CHRISTINE TODD WHITMAN
Governor

JANE M. KENNY
Commissioner

January 20, 2000

Dear Chief Financial Officer:

This office has been advised by the New Jersey Department of Environmental Protection that your municipality has been successful in establishing a new open space funding program by referendum in November, 1999.

The law specifically requires funds raised through the dedicated tax to be deposited into a dedicated trust fund called the "County/Municipal Open Space, Recreation, and Farmland and Historic Preservation Trust Fund". The county or municipality must formally create the trust fund by passing a resolution requesting dedication by rider trust fund approval from the Division. A copy of the referendum question and certified results of the election must be submitted with the Dedication by Rider. A CAP base adjustment will have to be made for any previously budgeted current fund appropriation shifted to the trust fund.

Interest earned on investment of the funds is to be credited to the fund. Sub-accounts may be created if the referendum required specific dedication by use of funds.

In order to ensure public disclosure and accounting of funds under this law, the Division is requiring that the amounts and purposes be disclosed as part of the annual budget process. To this end, a separate section of the budget has been created, to formally document the fund's accounting. The amount of tax levy, which must be reported on the open space budget form, will be certified to the County Board of Taxation by the Division at the same time the municipal purposes tax levy is certified. Planned capital spending of trust funds must be included as part of the local unit's capital budget.

Should you have any questions, please call the Bureau of Financial Regulation & Assistance at 609-292-4806.

Respectfully,

Christine M. Zapicchi, Bureau Chief
Bureau of Financial Regulation &
Assistance

TOWNSHIP OF FRANKLIN
RESOLUTION FOR DEDICATION BY RIDER

R- 31-2000

WHEREAS, the Division of Local Government Services, Department of Community Affairs, State of New Jersey has promulgated regulations for the New Jersey Recreation and conservation, Farmland Reservation and Historic Preservation pursuant to the Open Space Taxation (Chapter 24, P.L. 1997, as amended); and

WHEREAS, such regulations provide for an Open Space Tax to be collected by the municipality to be based upon the New Valuation Taxable with the municipality; and

WHEREAS, such tax shall be accounted for and forwarded to the Finance Office in the township on a monthly basis.

NOW THEREFORE BE IT RESOLVED, by the Township Committee of the Township of Franklin that such taxes received by the municipality be placed in a specific trust fund and such trust fund shall be considered a "Dedication by Rider" to the budget of the local unit per N.J.S.A. 40A:4-30 for the sole purpose stated above.

BE IT FURTHER RESOLVED, that any interest earned from an investment of funds available in this trust fund be retained by the trust fund.

BE IT FURTHER RESOLVED, that two certified copies of this resolution be filed with the Director of the Division of Local Government Services in Trenton.

Adopted at the Township Committee meeting of the Township of Franklin held on January 31, 2000.

TOWNSHIP OF FRANKLIN

EXHIBIT 1 to SCHEDULE B

RECREATION AND OPEN SPACE INVENTORY

Local Unit: Township of Franklin County: Gloucester

NOTE: All lands held for recreation and conservation purposes (1) must be described by their block and lot identification numbers as shown on the current, official tax map and (2) keyed to a current, legible, official map of the Local Unit and current tax map of Local Unit. The official map used for this ROSI is named and is dated, 19.

Wholly Undeveloped Lands Held for Recreation and Conservation Purposes

Table with columns: Key, Municipal Location, Name, Block, Lot, Acres. Rows A through M.

Subtotal of Acres on this page

Total Acres of wholly undeveloped lands from all pages of this ROSI

Certification: I HEREBY CERTIFY that this Exhibit 1 to Schedule B, comprising total pages, is a complete and accurate listing of all lands held by the Local Unit, as of this 10 day of August, 19 99, for recreation and conservation purposes during the time of receipt of the loan or grant. This ROSI is being submitted to Green Acres as part of the project entitled

Malaga Lake Park
Chief Executive Officer of Local Unit
Date: 8/10/99

Planning Board Chairperson
Date: 8/10/99

This Certification is to be signed only on this, page 4, of EXHIBIT 1 TO SCHEDULE B. If necessary, use the form on the first following page for additional developed lands, and use the form on the second following page for additional undeveloped lands.
